To Whom It Concerns

My family and I would like to object most strongly to
The granting of a waste license re proposed incinerator, at Carranstown
Duleek Co Meath.

The following are our reasons.

[1] Danger of air pollution, re dangerous chemical emissions, which
according to indavers own E, I, S , will include, mercury, lead, nitrous
oxide, etc, and of course dioxins , one of the most dangerous chemicals
, known to man.

[2] Contamination of food supply, from above chemicals, especially farm
based i.e. dairy product, including milk supply

[3] Further contamination of our waterways, streams, rivers, etc, and of
course our fishing lakes, and our fishing stocks.

[4] Further lowering of our existing air quality ,by way of continuous wagon
train of 40-ton trucks, drawing waste to and from site.

[5] Area is already over burdened and over taxed, with an excessive heavy
traffic base, as a result of already having a heavy industrial base,
which includes cement factory, ready mix plant, and several large quarry's
among others, and cant and shouldn't be asked to take any more.

[6] This area already suffers from very high incidence of cancer, asthma,
respiratory ,and many more serious illness problems, building an
incinerator will definitely increase these problems

[7] Type of incinerator proposed [grate type] is already out of date,
and has for example, no catalytic filter fitted,
and already there are newer non-burn technologies coming on stream.

[8] Site is in the heart of the Boyne Valley area, and on the edge of a world heritage site, i.e. Newgrange, and as such is totally unsuitable.

My family and I total 7, sincerely hope you will not grant a licence for this Proposed plant , and genuinely believe that new non burn technologies will In the near future prove more financially viable, and much cleaner and efficient towards the environment, which we all have to survive within.

Yours

Patrick and Carmel o Brien

Also on behalf of , Jennifer, Keith , Lisa, David ,Andrew.[our children]

Please acknowledge receipt of the above, as soon as possible.

Thank you.
