Dear Mr. Macken,

I understand an application has been received for a license for an incinerator which Indaver Ireland Ltd. propose to build in Duleek near Drogheda. Can you let me know whether this information is correct?

I have been informed by a Drogheda resident that Indaver have been found to be in breach of licensed limits for dioxins at one of their incinerators in Belgium. Do you have any information on this and whether or not the information is accurate?

Can you also let me know what are the standards which you would be requiring if a license for this incinerator were to be issued.

Thanking you in anticipation.

With best wishes,

Nuala Ahern MEP
