Mrs A. Brady
37 Boyle O'Reilly Terrace
Drogheda

Sub 10

To whom it concerns,

I am writing to object in the strongest terms my total opposition to Gndaver and the waste licence application reference 167-1. Granting a licence to Gndaver will be detrimental to the people of Drogheda and Carranstown and all surrounding areas 40 or 50 thousand people.

The emissions of toxins into the air will be carried in the winds for miles around and will destroy peoples health it will also contaminate the land which in turn will contaminate water, food supply, cattle, dairy produce, sheep, potatoes, fruit, veg, wheat, barley etc etc, and then the disposal of the toxic ash, reprocessing is the only healthy option, Drogheda has a high rate of all types of cancers, children with asthma, eczema, allergies.

I worry about my children and grandchildren who have these complaints. Would you want an incinerator up the road from you? I don't think so, what's good enough for you is good enough for me. Our health is in your hands please make the only and right decision for the good of the people. It's not that there is no other option to incineration there is reprocessing. We take care of the land and the land will take care of us.

Mrs A. Brady
