To whom it may concern,

I would like to object to you granting a licence to Indaver,(ref 167-1), to operate an incinerator at Carronstowns,Duleek ,Co.Meath. I live only a short distance,less than a mile from the site.

It should be rejected on the following grounds:

- the health implications for us living nearby by are appalling
- the damage to tourism in the Boyne Valley area and Meath as a whole.
- the effects on farming,land values,the food produced and the effects of the animals...cattle,sheep etc.
- it will have an impact on people's livelihoods.
- there will be a major amount of toxic/waste ash...were is that going to go?
- when there are winds the pollution could end up anywere.
- a nation school is in the line of fire too,what about those children?

these are just a few examples,there are many more.

I expect to get from you a written acknowledgement,email or postal.
