Ref. Inclusion 167-1

Re: submission regarding the Proposed Inverder
municipal waste management facility at
Caranstown Duleek Co. Meath.

Dear Sir

I am living in the Area for the past 69 years
I am living 260 meters from Irish Cement the dust
and noise is bad, with the proposed incinerator
going to be built 270 meters on the left side of me
my life will be a hell with the extra
traffic which at the moment it takes me 10 mins
to cross the road to visit my sister Margaret Smyth.
The emissions and toxins that will come
from the plant will cause serious danger to
my health.

Medical research has proved. these are the cause
of cancer. and of the respiratory system all
these things are causing me great distress. My
home will be devoured and I will have no
privacy.

Based on the foregoing, we the Caranstown Residents
group strongly object to the issuing of an

Integrated Pollution Control license to Invader's
Waste Management Facility at Carranstown
Dulceek Co Meath.

Yours faithfully

on behalf of the Carranstown Residents Group

Mary Leonard.

Jimmy Leonard.
