EPA 219-

Our family have enjoyed  
life in this lovely  
little place for the  
past 40 years, but  
as the saying says  
all good things  
come to an end.

We can't sit outside  
and enjoy it any  
more. This awful  
smell takes over and  
we are forced to  
go in, close our  
windows and  
not even dry  
our clothes outside.  
Organic Gold seems  
a nice name to  
give such a smell.

but that not even discerning  
it, & to the worst of  
smell imaginable.  
Why is this allowed  
to go on, have  
our children and  
your children to  
live with this,  
& it devalues our  
homes, no one  
wants to live here  
and who could  
blame them, I appeal  
to EPA to give  
us back our life  
again and rid us  
of this smell and let  
us take out our own  
children and play  
and sit with them.  
We deserve to be  
able to dry our  
clothes out side  
and not to be

in with door ~~clothes~~  
closed. I would be  
fair minded but this  
cant go on or come  
to our aid and give  
us back gods fresh  
air again.
