Re/ Proposed Erection of an Anaerobic Digester on the Banks of the Slaney (Killurin)

A Chara,

I'm writing to you to express concern with regard to Reenard Farms Ltd. application to the Environmental Protection Agency for a review and extension of a licence to incorporate the use of an Anaerobic Digester at Killurin, Co. Wexford. (Reg. No. 742).

I'm very worried about the following aspects of the Project:-

- Pollution of the River Slaney
- Odours
- Traffic
- Alleged deficiencies in the Licence Application to the E.P.A.
- The Importation of gases from the existing Landfill.
- Some 95% of Slaney valley residents live downwind of the proposed site

The local residents have been in contact with me and needless to say they raised many more issues with me than I have listed above.

I believe it essential to protect the waters of the Slaney and I implore you to give very careful consideration to the fears of the local residents.

Yours sincerely,

*Seán Doyle*
