Re: Waste Licence Application by Thornton's Recycling Ltd
For a Composting Facility at Pass of Kilbride, Milltownpass, Co Westmeath

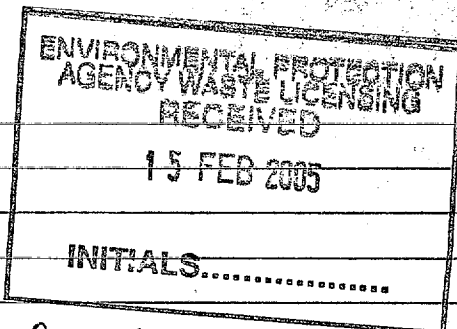

Dear Sirs

I wish to object to the proposed granting of this licence for the following reasons:-

1. The proposal is contrary to the Westmeath County Development Plan.
2. It could have a damaging effect on the health of the people in the area.
3. It could cause the pollution of air, surface water, water courses, and ground water in the area.
4. It could lead to an increase in vermin and scavenger-birds.
5. It could damage the wells in the area.
6. It could damage fish-breeding areas downstream in the Kinnegad River.
7. It could create odour problems.
8. It could create noise pollution.
9. It could have a severe effect on the Milltownpass N.H.A. next to it.

Yours faithfully

Anne Coleman

RE: Waste licence application to Thorntons Recycling Ltd.
for a Composting facility at Pass of Kilbride
Milltownpass Co Westmeath.

Dear Secretary

- * I wish to object to the proposed granting of this licence for the following reasons.
 - * The proposed facility will be in contravention of the Midlands Waste Management Plan.
 - * The proposed plant could have a detrimental effect on the health of the people in this area + surrounding hinterlands, especially Milltownpass where recently there has been a new Atheistic Unit opened at the primary school by Minister Hanrahan.
 - * Bio-aerosols released by the plant could cause serious damage to animals in the area, which is largely a bovine + equine breeding area.
 - * Wells + rivers in the area would be contaminated.
 - * Upgrading of the road which is proposed, would in turn lead to lowering of the natural water table of the bogland.
 - * Increase of pollution would be inevitable, such as odour, flies, noise + dust.
 - * Raw material for the proposed facility will be transported by road from the Greater Dublin + Galway areas Hotel + Catering waste (E: Beef + Chicken imported from South America where Foot & Mouth disease is rife).
- Therefore I feel this plant should be located close to existing landfill site + not in a rural, agricultural setting.

Yours Sincerely
T.M. CORRIGAN + M. Corry

Re: Waste Licence application to Thorntons Recycling Ltd. for a Composting facility at Pass of Kilbride, Miltownpass, Co. Westmeath.

Dear Secretary,

I wish to object to the proposed granting of this licence for the following reasons:

We are a Commercial Stud farm located within a half mile radius of the proposed Facility at Pass of Kilbride, Miltownpass and it has taken us many years to build up a successful business at our present location. The main basis of our success is the healthy livestock we are currently breeding and selling internationally.

Our main concerns are based in fact, it is a proven that facilities of this kind are known to release harmful spores and bio-aerosols into the environment. This will directly affect the health of our livestock through changes that will occur in the environment – initially air quality.

Thoroughbreds are more susceptible to disease, sickness and changes in their external environment than any other equine animal.

They are also however extremely prone to respiratory disease, this will in turn directly affect their usefulness for both racing and breeding. One of our concerns is an allergic condition known as CHRONIC OBSTRUCTIVE PULMONARY DISEASE. This is a chronic respiratory condition due to the horse developing pulmonary hypersensitivity to organic dust antigens in the environment. This can be attributed to bio-aerosols released into the atmosphere from facilities such as the above mentioned.

LEMONGROVE STUD

Another concern is our spring, which runs directly through our land this is our animal's main source of water and this too in turn will be affected.

Apart not only from our livelihood being affected we have grave concerns about the air quality and environmental impacts the facility will have on our own health and that of our family.

Therefore I feel that this plant should be located in an industrial region or close to an already existing landfill and not in a rural and agricultural setting such as Pass of Kilbride in Milltownpass. I hope you will take my fears and concerns into account and refuse a Waste Licence to Thorntons for this plant on the reasons I have mentioned above.

Yours Sincerely,

Thomas Wallace.

Re: waste License application to Thorntons Recycling Ltd. for a Composting facility at Pass of Kilbride, Milltownpass, Co. Westmeath.

Dear Secretary,

I wish to object to the proposed granting of this licence for the following reasons;

- The proposed facility will be in contravention of the **Midlands Waste Management Plan** and the **Westmeath County Development Plan**.
- The proposed facility could have a damaging effect on the **health** of the people in the local area and surrounding hinterlands, especially in the village of Milltownpass where recently there has been a new **Atheistic Unit** opened at the primary school by Minister Hannafin.
- Also the bio-aerosols released by this plant could cause serious damage to animals in the region, as this is an Equine and Bovine breeding area.
- This plant is proposed to be constructed on an underlying aquifer which in turn feeds all the local wells in the area and also into the **Kinnegad river** and its spawning grounds which is a tributary of the **Boyne river**.
- This proposed plant will also lead to an **increase in pollution**, such as vermin, flies, odours, noise and dust.
- The proposed Composting Plant could have a serious and damaging effect on the bordering **Milltownpass National Heritage Area**, by their proposal to upgrade the road which would in turn lead to lowering of the natural water table of the bogland.
- The majority of **raw material** for the proposed facility will be transported by lorry from the greater Dublin and Galway areas. This includes mainly waste from the hotel and catering industries. This procedure would be highly dangerous as it would include meat particles such as chicken and beef imported from South America, which is notorious for its outbreaks of **Foot and Mouth**.

Therefore I feel that this plant should be located in an industrial region or close to an already existing landfill and not in a rural and agricultural setting such as Pass of Kilbride in Milltownpass. I hope you take my fears and concerns into account and refuse a Waste Licence to Thorntons for this plant on the reasons I have mentioned above.

This procedure would be highly dangerous as it would include meat particles such as chicken and beef imported from South America, which is notorious for its outbreaks of **Foot and Mouth**.

Therefore I feel that this plant should be located in an industrial region or close to an already existing landfill and not in a rural and agricultural setting such as Pass of Kilbride in Milltownpass. I hope you take my concerns and fears into account and refuse a Waste Licence to Thorntons for this plant on the reasons I have mentioned above.

Yours sincerely

Re: Waste License application to Thornton's Recycling Ltd. for a Composting facility at Pass of Kilbride, Milltownpass, Co. Westmeath.

Dear Secretary,

I live in the **Milltownpass** area and I wish to object to the proposed granting of a licence to the above for the following reasons;

The proposed facility will be in contravention of the **Midlands Waste Management Plan and the Westmeath County Development Plan.**

I feel the proposed Composting Plant could have serious effects on the bordering **Milltownpass National heritage Area**. This would mean that all waste from the hotel and catering industries which would be **transported by lorries could lead to a dangerous situation** in our area. This procedure would be a highly dangerous one, as it would include meat particles, such as chicken and beef imported from South America, which is notorious for its outbreaks of **Foot and Mouth**.

I also feel this facility could have a **damaging effect** on the health of the people in the local area and the surrounding areas, especially in the village of **Milltownpass** where a new Autistic Unit has just been opened at the local primary school by Minister Hannifin. Also the **bio-aerosols released by this plant could cause serious damage to animals in the region**, as this is an Equine and Bovine breeding area. I feel it could also do considerable damage to the wild life in the area.

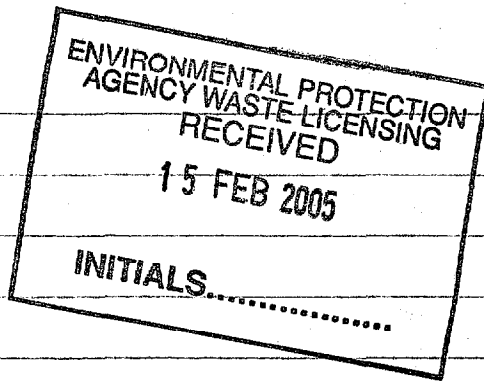

This plant is proposed to be constructed on an underlying aquifer which in turn feeds all the local wells in the area and also into the Kinnegad river and its spawning grounds which is a contributory of the river Boyne. This plant would also lead to **an increase in pollution**, such as all kinds of odours which would be **harmful to the environment** and also would lead to rats, mice, flies, and noise and dust.

Therefore I feel that this plant should be located in an industrial region or close to an already existing landfill and **not** in a rural agricultural area such as the Pass of Kilbride in Milltownpass.

Having outlined my fears above, **please take them into consideration and Refuse a Waste Licence to Thornton's Recycling Ltd.**

Yours Sincerely
Mary Joyce

Re: Waste Licence Applic by Therntons Recycle
for a Composting Facility @ kilbride
Miltownpas -

Dear Sir/Madam,

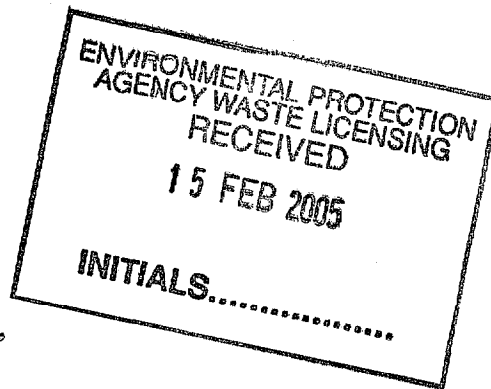

I wish to object to the proposed granting
of this licence and would ask you to refuse
this licence on the following grounds: -

1. The proposed facility could cause pollution
to our surface water, water courses and
ground water.
2. It could lead to health problems for local
farm animals, through bio-aerosols.
3. It could cause an increase in vermin, flies
and scavenging birds.

I sincerely hope that you take my objection
seriously, and refuse the granting of a licence
for such a project.

Yours sincerely
Stephen O'Hare

Re: waste License application to Thorntons Recycling Ltd. for a Composting facility at Pass of Kilbride,
Milltownpass, Co. Westmeath.

Dear secretary,

I wish to object to the proposed granting of this licence for the following reasons;

- The proposed facility will be in contravention of the **Midlands Waste Management Plan** and the **Westmeath County Development Plan**.
- The proposed facility could have a damaging effect on the **health** of the people in the local area and surrounding hinterlands, especially in the village of Milltownpass where recently there has been a new **Atheistic Unit** opened at the primary school by Minister Hannafin.
- Also the bio-aerosols released by this plant could cause serious damage to animals in the region, as this is an Equine and Bovine breeding area.
- This plant is proposed to be constructed on an underlying aquifer which in turn feeds all the local wells in the area and also into the **Kinnegad river** and its spawning grounds which is a tributary of the **Boyne river**.
- This proposed plant will also lead to an **increase in pollution**, such as vermin, flies, odours, noise and dust.
- The proposed Composting Plant could have a serious and damaging effect on the bordering **Milltownpass National Heritage Area**, by their proposal to upgrade the road which would in turn lead to lowering of the natural water table of the bogland.
- The majority of **raw material** for the proposed facility will be transported by lorry from the greater Dublin and Galway areas. This includes mainly waste from the hotel and catering industries. This procedure would be highly dangerous as it would include meat particles such as chicken and beef imported from South America, which is notorious for its outbreaks of **Foot and Mouth**.

Therefore I feel that this plant should be located in an industrial region or close to an already existing landfill and not in a rural and agricultural setting such as Pass of Kilbride in Milltownpass. I hope you take my fears and concerns into account and refuse a Waste Licence to Thorntons for this plant on the reasons I have mentioned above.

Re: Waste licence application by Thornton's
Recycling LTD for a composting facility
at pass of Kilbride, Milltownpass, Co. Westmeath

I wish to object to the granting of this
licence for the following reasons

I Erika Minaguchi,
think that the health of this
community is very important so that we
all grow up in a healthy lifestyle.
I think putting the compost dump will damage
our health. Everyone around this area will be
affected by the compost dump because it can
cause pollution of air, surface water,
water course, and ground water in the area
and may cause odour problems

Yours sincerely

Erika Minaguchi

Re: Application by Thornton's Recycling Ltd for a composting facility at Pass of Kilbride, Milltownpass, Co. Westmeath.

To whom it may concern,

I Claire-Jean Marron wish to object strongly against the possible granting of a waste licence to Thornton's Recycling Ltd for the purpose of processing large quantities of waste at Pass of Kilbride, Milltownpass Co. Westmeath for the following reasons:

- (1) The road leading to the site is totally unsuitable for the amount and size of the proposed traffic.
- (2) This could possibly have a serious damaging effect on the health of people in the area.
- (3) Possible increase in vermin, flies and scavenger-birds.
- (4) Possibly create odour problems.
- (5) Bio-aerosols could damage human and animal health.
- (6) Imported Livestock Diseases. in RAW MATERIAL -

- (7) The facility will be in contravention of the Midlands Waste Management Plan.
- (8) The proposal is contrary to the Westmeath County Development Plan.
- (9) It could cause the pollution of air, surface, water, water courses, and groundwater in the area.
- (10) It could damage the wells in the area.
- (11) It could damage the underlying aquifer.
- (12) It could damage fish-breeding areas downstream in the Kinnegad River.
- (13) If there was a Fire at this site it would take a long while before the ^{Fire brigade} could get to the site, the nearest fire station is in Mullingar and Killbeggan Co. Westmeath.

Re: Application by Sherringtons Recycling Ltd. for a Composting facility at the pass of Kilbride Milltownpass Co West Meath.

To Whom it may concern

We Francis & Olive Marron of the above Address wish to strongly object to the possible granting of a waste licence to Sherringtons Recycling Ltd. for the purpose of processing large quantities of waste at pass of Kilbride Milltownpass Co West Meath for the following reasons.

- (1) The road leading to the site is totally unsuitable for the amount and size of the proposed traffic as it is very uneven and narrow as I go that road four times a day and its impossible when I meet lorries.
- (2) The serious damaging effect on health of our family & neighbours in the area.
- (3) An increase in vermin and scavenger birds and flies we will be unable to open our windows in the summer.
- (4) odour problems. again unable to air our homes
- (5) bio - aerosols could damage human and animal health.
- (6) Imported livestock Disease in Raw material.
- (7) The facility will be in contravention of.

of the Midlands ^{II} Waste Management plan.

(8) The proposal is contrary to the Westmeath County Development plan.

(9) It could cause the pollution of air surface water water courses and ground water in the area.

(10) damage our wells

(11) It could damage the underlying aquifer

(12) it could damage wild life fish breeding areas downstream in the Kinnigad River which flows in to the River Boyne.

(13) if there was a fire at this site it would take the fire brigade some time to get to the site as our nearest fire station is 12 miles away in Mullingar and Kellsbeggon Co West Meath

14 please Sir think of us when you make your decision Thank you
