**Re: Review of IPC Licence Reg. No. 180, Glanbia Fresh Pork, Carrick Road,
Edenderry**

Dear Sirs,

I refer to your correspondence of 9th January in relation to the above. (Reg. No. 761).

Offaly County Council note Glanbia's request for change to its current discharge licence including an increase in limits for the following parameters: Nitrates, Sulphates, and Chlorides. Offaly County Council are concerned at the impact this may have on Edenderry Sewage Treatment plant and the planned proposals for the plants upgrade which are at an advanced stage and will be carried out under a Design, Build and Operate contract.

Offaly County Council query why Glanbia require to increase the above limits in view of the recent upgrade of Glanbia effluent treatment process as part of Planning Permission.

Offaly County Council is in contact with Glanbia in relation to the proposed licence changes. Offaly County Council is considering the implications of such changes on its sewage treatment plant and the proposals for imminent upgrade of the plant. Offaly County Council intend to revert to the Environmental Protection Agency following this, and its discussions with Glanbia, and we would request that the EPA take this into account and consult with Offaly County Council again prior to licence issue.

Yours faithfully,

Tom Shanahan,
Senior Engineer,
Water Services Section
