Dear Noeleen

Planning application at Deeps Kilpatrick – Anaerobic Digester (NRGE Ltd)  
Planning Ref: 20053035 Licence no:742

Please accept this letter as a formal objection to the above referenced proposed development.

The reasons are as follows:

1. That the proposals have been submitted without any formal Environmental impact assessment which by my understanding is a legal requirement under EU law. In my opinion, and in my experience in a similar situation, the licence cannot legally be granted.
2. That the applicant's environmental record in other plant it manages suggests that they are unable to run such a plant in an acceptable manner. I understand that this is a matter of record in your offices, and relates at least in part to a facility at Castleblake, Rosegreen Cashel.
3. That the development is in any event completely inappropriate in the area, being an area of outstanding beauty, used for tourism and recreation, which is heavily residential, and served by inadequate roads.

I urge you not to issue the licence required for the operation of this plant. I am hopeful that your solicitors will confirm the illegal nature of this development.

Sincerely

  
Chris Harvey
