To whom it may concern.

I wish to lodge my objection to the Application of Hogan Cement to Burner Meath and have ahead at their Plant at Killahehler Near Kinnegad. Ref No TA/50145.

The Burning of MBAs will have a Negative effect on the community, in a number of ways. Firstly the value of Property will reduce. The Quality of life for the locals will also be greatly affected. The overall gains that may result in the burning of meat and bone meal will be greatly outweighed by the the negative effects. Why should the majority Detraction of the locals suffer while the company happens make huge monetary gains. Unfortunately there is not enough scope to write the objection that should be written. I hope the EPA will do what it is there to do. I protect our environment it is precious and I want it to be in the same condition for my children as it is for me, and we don't want a big company to change it, or damage it in any way.

Yours Sincerely
Barry Smith
