To whom it concerns in E.P.A.

I would like a copy of the expert scientific evidence to back up the view of the Inter Departmental/Agency Committee on Disposal Options for animal waste M.B.M.

The E.P.A. was represented on the Committee by Marie O'Connor + Leo Sweeney.

For example

The effects of M.B.M. ash on cement — the quality of same. The effects on the people handling it. Effects on water pipes — buildings — storage tanks etc. etc. also on the environment and on the public, and on the suitability of bagaw cement factory, in view of all the dust fall out on own houses — gardens — veg fruit trees etc on a regular basis. An early reply will be appreciated.

Thanking you

Nancy Coffey.
