Subject: Corrib Gas - cold venting

Dear Ms. Donlon,

Re: Application No. P0738-01

As no planning permission has been applied for from Mayo Co Council in respect to the cold-venting of gas from the proposed refinery at Ballinaboy, please clarify the role of the EPA in view of Ms. Niamh Leahy's statement to Mayo News, Dec. 20, 2006 when she says;- "The issue of cold-venting of emissions will be dealt with as part of this application".

Am I to understand that the EPA intend to process the IPPC licence regardless of my submissions to date especially in regard to EU EIA requirements and the fact that the EIS submitted by Shell to Mayo Planning Authority was altered fundamentally in response to your request for further information. The so-called 'Addendum' to the EIS was in fact a fundamental alteration of the original text.

Also would you please indicate which part of the EIS deals with the implications of the annual shutdown of the proposed refinery.

Thanking you,

Yours sincerely,

Imelda Moran.
