

My son - Michael + myself
 live + farm approx. 1 mile South
 of this site. We would have major
 concerns regarding the above proposed
 development.
 Our health + that of our animals
 (deteriorated + neediness + young stock)
 from possible emissions from this site.
 All our drinking water comes from
 a well 150 feet deep + there is no
 council water in this area. Pollution
 would effect us + the angle river
 may also be polluted which is harmful

Dear Sir / Madam
 Proposed Anaerobic Digester, Ballard. 6/1/2007
 co. Lond.

Billings & West
 Agents
 Wilmslow
 Cheshire
 Sub 9

through our farm. There is also a lot of winter springs on our land + that would effect the ground water running into the Orugh River - fish etc.

We have a private forestry Plantation approx 90acrs some is 11 years + more is 2 years old + there is backs of older forestry in which there must be a lot of wildlife. Explosions - noise - vibrations - Fire would have a major effect on all this.

Please remember the above concerns of which please be sure there is many more before there is any planning granted.

Yours faithfully
Diana + Michael Beary
