Dear Sir/Madam,

I wish to make it known that I object to the proposed ANAEROBIC DIGESTER at Ballard Araglen Kilworth Co Cork

Ref. No. W0230-01

The site for this Project is just a very short distance from the local National school, not to mention the neighbours who are even closer to it, and I am fearful and worried that emissions from this project will be harmful to the health of these children and my neighbours. I will have a beautiful granddaughter attending the school in a couple of years time and I don't want to be putting her health at risk. I worry also about the possibility of water pollution. I worry about any vibrations that this plant would create. The site is not the best quality ground for such a huge project.

The Road structure is not suitable for all the heavy lorries that would be involved in the haulage of the waste, and the emissions from the lorries and their contents would be just as bad if not worse than the project itself. Also the birds, folk and wild life need to be taken into consideration as well as the people.

As a person who likes walking, I would point out, the people use the road involved, as it is part of The MUNSTER / AVONDHU WAY

All these extra loeries would make, such a beautiful walk, a very dangerous place.

I could go on and on and on.

I Beg you, please, to use common sense at its best and DO NOT ALLOW this outrageous project to be built on this site.

Sincerely

Catherine Lomasney
