**Re: South East Recycling Co. Ltd, Carrigbawn, Pembrokestown, Wexford
(Present Licence No. WO111-01.)
WASTE LICENCE APPLICATION WO111-03**

Dear Sir/Madam

We wish to make a submission in relation to the current application by the above mentioned company to increase the tonnage on their licence, to extend their hours of business and to include household waste in their waste management business.

It is our understanding that they are already collecting and housing household waste and exceeding permitted hours of business. They also appear to have a practice of disregarding the conditions of their Licence. These failures have been brought to light in Court Cases and local newspaper reports.

The operation as it stands is unsuitable as it is creating offensive smells and a high level of noise in a residential zone. It is impinging on the quality of life of residents in this area. At weekends, as well as during the week, there is a constant clamour of glass and other waste being moved and crushed. The resulting heavy vehicle traffic is a major hazard on an overburdened, very narrow road which has numerous bends.

The EPA should now take responsibility for the environment and exercise it's duty of care for the safety of residents in the vicinity of this hazardous nuisance.

Yours faithfully

Francis Lally
