To whom this may concern

In light of a lot of things I learned at the E. pa oral hearing and at an tuise meeting in belmullet. I am very worried and concerned about the water and the very high level of pollution that will be going into the air at all times. We don't want to be looking back in a few years or less knowing it should and could have been prevented. We are at a stage where it can be stop now. We have had in the passed Children staying here with us from Chernobyl we have seen what devastating consequences of something that never should have happened are ye going to let this happen here will mine and all the other people ^{that} live so close to where shell wants to put this refinery be left here in danger. as a mother of four very young children ages nine six and two and half year of age I am asking you to think of our health and safety it should be made a priority. I hope you will very carefully address all those matters I look forward to hearing from you very soon

Thank you

Philomena Moran
