Group.

Dear Ms Keavey

I refer to your letter dated 27th February and note that an oral hearing has been arranged for the 14th April, which is approximately six weeks from now.

We are not aware of the basis on which the EPA made its decision to grant a Waste Licence in respect of this application and we therefore request you to let us have, forthwith, the following:

1. Copies of all submissions made to you by all parties, relating to the application for a waste-licence, including all Environmental and Health Statements which you received or which were communicated to you in any way.
2. Copies of the Notice of Application for the Waste Licence.
3. Copies of all further information requested by you and received by you.
4. Details of the regulations under which you have granted the EPA Licence.

Details of all independent inquiries and assessments which you yourselves made in relation to the proposed facility. Details of all enquiries and results which you have made and received in respect of Safety, in respect of Traffic coming to and from the

Facility. Details of the Health Risks involved both in relation to the running of the facility and in relation to the traffic generated by the facility.

At the oral hearing of the Planning Application for this facility, there was a conflict of evidence relating to the Health Dangers arising from the facility. Has the Board of the EPA taken any independent Assessment of:

- (a) The risks of incineration generally
- (b) The risks of this particular very large sized incinerator in which we believe it is proposed to burn six hundred thousand tonnes of municipal waste.

Details of enquires made by you relating to inspection procedures and monitoring facilities in respect of the waste delivered to the facility and the omission of forbidden toxic substances not acceptable for incineration from any trucks or waste received by you.

We look forward to this information urgently.

Yours Sincerely

Walker & Co.
