Re: Nurendale Ltd t/a Panda Waste Services Ltd  
W0140 - 03

Dear Sir,

We wish to object to Nurendale Ltd t/a Panda Waste Services Ltd being granted a licence to expand operations to process up to 250,000 tpa instead of 165,000 tpa. At the moment with their licence at 165,000 tpa there is a lot of dust, noise and odour coming from the machines they are using and their yard. If they got this licence the noise, dust and odour would be a lot worse.

The conditions state that the facility shall be operated from 7.30 am but some mornings they are working in the yard from 5.00 am. When the machines are working early in the morning our family is awake during the night and are very tired the next day.

Our yard is 50 yards (approx) from their yard. The dust and the odour is causing a lot of inconvenience for our family and animals. We are milking the cows twice a day.

and this dust can cause the cows to cough  
also to ourselves this dust is not healthy  
and sometimes the odour is very sickening.  
There is also paper dust and plastic on  
the grass where the cows are eating it is  
very hard to clear the bits of paper off  
the grass completely

We feel that if they are granted the  
licence for 250,000 tpa these problems would  
be a lot worse. Please find enclosed cheque  
£200.

We look forward to hearing from you

Yours sincerely

GERRY
