RE: PROPOSED DEVELOPMENT BY OXIGEN AT CORRANURE LANDFILL INCLUDING BIOLOGICAL TREATMENT FACILITY

16.12.08

I am writing to let you know I am discusted at the idea of Oxigen seeking to transform the landfill at Corranure to one of the largest facilities for disposing of landfill and treatment of biological waste in Ireland.

To think my sister moved out to the Cootehill Rd from Cavan town to have a better quality of life. I regularly go out that direction to visit my mother, who lives with my sister. You can imagine the "clean country air" is no longer in existence any more with the horrendous smell that is released from the dump. I am very worried that it will affect my 73yrs old mother, nephews, nieces etc...I can't see how this potent smell will not affect our health. I live in Cavan town at Beech Hill and I can get the smell at my house (approx 2 miles). We have to shut the windows as it gets so bad.

Our community has put up with the dump for too long now and it is about time our town has been given a break. We don't want our county to be known for its "super sized" dump. I can't see how this will be any good for the value of our property. The local community will no longer have a simple pleasure of doing some gardening or to sit out and enjoy the fresh air.

It is sad day when I have had to sit in front of my computer and write this letter to express my concerns with the future of Corranure Landfill site and the future of our community.

I thank you for your time in reading this letter and hope you make the right choice.

Yours faithfully

James Smith
