Ann,

Can you please upload the emails below as response from Water Services Authority for Technical Committee Report.

Thanks,
 Loretta.

Loretta,

Apologies for the slight delay in responding, as the discharge is to sewer and therefore to the Westport WWTP please set a limit of 30mg/l for Oils, Fats and Greases in conjunction with the other parameters.

Regards,

Larry.

Subject: RE: allergan objection

Larry,

Thanks for that. I note that the single point discharge would have the emission limit values below. There is no limit on Oils, fats and greases - would you like to set a limit for this?

Many thanks,
 Loretta.
 Tel: 268 0207.

Emission Point Reference No:

Name of Receiving Waters:

Location:

Volume to be emitted:

SE1 (100489E, 285143N)

Clew Bay, via Westport WWTP

Outside main entrance

Maximum in any one day: 700 m³

Maximum rate per hour: 40 m³

Parameter	Emission Limit Value	
Temperature	35 °C (max)	
pH	6 – 9	
Toxicity	5 TU	
	mg/l	kg/day
BOD	500	100
COD	2,200	500
Detergents (as lauryl sulphate)	5	3.5
Total Residual Chlorine	5	3.5
Mercury	0.005	0.0035
Undenatured Botulinum Toxin	None detectable	None detectable
Total Phosphorus (as P)	15	10.5

Subject: RE: allergan objection

Dear Loretta,

I have reviewed the Allergan objection and the revised arrangements that are proposed are acceptable.

The proposal that a grease trap be installed on the effluent discharged from the canteen and that this effluent is directed to the on-site Balancing Tank and emitted as a single point discharge is acceptable.

The proposed Condition 5.6 will therefore have to be amended to cater for the revised arrangement.

Regards,

Larry.

Hi Larry,

Just wondering if you got a chance to look at the Allergan objection?

Many thanks,
Loretta.
