

01/01/09.

Dear Sir/Madam

I'm Making this Submission in regard to the Proposed Waste Management Facility on the Cookehull Road, Cavan.

As a local Resident Living within $\frac{1}{2}$ mile of the Facility and as a parent I feel I must do something.

Nobody can say what chemical reactions take place in landfill, what gases are produced and what effect they will be on health of my children and the local community as a whole.

How can it be possible to let landfill rise so high into the skyline and ruin the natural landscape and can only be described as a complete eye sore to every one that passes by

Thanks for taking time in reading these submissions and hope you take them into your ~~Account~~ decision on this application

Regards Kevin H' Gouern
