Ref: APPLICATION BY OXIGEN ENVIRONMENTAL LTD. FOR A LICENSE TO OPERATE AN INTEGRATED WASTE MANAGEMENT FACILITY AT LISMAGRATTY AND CORRANURE TOWNSLAND, COOTEHILL ROAD, CAVAN, CO. CAVAN.

Dear Sir/Madam,

I am writing to you about the above application for a waste license by Oxigen and would like to register my objection to said license.

As a resident of over 16 years in Corratubber, Cavan which is situated half a kilometre from the Corranure landfill, I feel that the said landfill has become a serious health and social hazard to our area.

It has been repeatedly reported by your agency that the landfill has been in breach of its current license month after month. I feel that if Oxigen cannot control and manage the site at present it will definitely be unable to manage a larger site as proposed in the future.

In correspondence with a number of our neighbours we feel that the value of our homes have been seriously devalued by the current landfill as the fumes and terrible odours mean we cannot enjoy the use of our homes and gardens. Doors and windows have to be kept shut at all times and our children cannot play outside. Our lives have been so affected that I feel that I may have to be relocated which will cause me financial hardship as our homes are not sellable due to their close proximity to the landfill site and the terrible odour that emits from it.

We may have to take legal action to be compensated for the devaluation of our homes plus the cost of relocation. The granting of a new license will only add to problems for all surrounding homes and businesses.

I also feel that until a detailed health study is carried out as to the possible health risks involved from the gas and odour emitted from the landfill site, that the site remains closed and that no new license be granted.

I would ask that your agency refuse any application for a license and that the landfill site at Corranure, Cootehill Rd. Cavan be permanently closed.

Yours sincerely.
