Mr Joe Reilly
Programme Officer
Office of Climate, Licensing & Resource Use

11th January 2009

RE: Reg No. W0201-02

Submission on other objections to the proposed decision of the Agency on a waste licence application by Bord na Mona Plc in respect of a facility at Drehid Waste Management Facility, in the townlands of Parsonstown, Loughnacush, Kilkeaskin, Drumond, Timahoe West, Coolcarrigan, Killinagh Lower and Killinagh Upper, Carbury, Co. Kildare

Dear Mr Reilly

I refer to Bord Na Mona's objection to Condition 5.4

The licensee shall ensure that all or any of the following:

- Vermin,
- Birds,
- Flies,
- Mud,
- Dust,
- Litter,

For inspection purposes only.
Consent of copyright owner required for any other use.

associated with the activity do not result in an impairment of, or an interference with, amenities or the environment at the facility or beyond the facility boundary or any other legitimate uses of the environment beyond the facility boundary. Any method used by the licensee to control or prevent any such impairment/interference shall not cause environmental pollution.

Bord na Mona suggested that this condition be reworded to: ".....significant impairment of, or significant interference with, amenities or the environment at the facility or beyond the facility boundary....."

I expect that as I live approximately 4km away from the landfill site that I should have none of these issues. I would therefore request that if the EPA do change the wording of this condition, that they also add in a line in the condition to reflect this. For example:

The licensee shall ensure that all or any of the following:

- Vermin,
- Birds,
- Flies,
- Mud,
- Dust,
- Litter,

associated with the activity do not result in a significant impairment of, or a significant interference with, amenities or the environment at the facility or beyond the facility boundary, or any other legitimate uses of the environment beyond the facility boundary. **Furthermore, it should not result in any impairment of, or any interference with, amenities or the environment beyond a ½ km radius of the facility or any other legitimate uses of the environment ½ km beyond the facility.** Any method used by the licensee to control or prevent any such impairment/interference shall not cause environmental pollution.

I understand that the agency will apply its own wording.

In the event that the agency decides to change the wording of Condition 5.2, I would also request that the same rule be applied this condition.

I appreciate the agency's consideration in this matter.

Yours sincerely,

Breda Logan
