Sub (40)

Konratoker
Karam
5/1/08.

Dear Sir / Madam:

As a resident of the Konranure / Konratoker Area, I wish to register my objection to the granting of a license to Oxygen Environmental Ltd to operate at the facility at Konranure, Karam.

Apart from the scientific reasons of health implications which have been outlined by many, I just want to convey my anger at the impact this 'dump' has on the quality of life in and around my home.

I'm fed up of keeping windows closed in case the house is

stinking of Gds so. I had the
misfortune of leaving windows open
overnight once, before I was aware
of the stinking gas, and woke up
sick and vomiting, as was my
young son. In summer, regardless
of weather, we cannot plan a
barbeque or enjoy the outdoors
because of the odour. I'm sure you
are aware that every summer we
have to have our homes 'sprayed'
against the infestation of flies &
blue bottles, unfortunately we cannot
spray the outdoors as well.

We are still paying a mortgage for
our home, but our property is actually
worthless because nobody wants to live
in this area anymore.

The bottom line is dumps should
not be situated in residential areas
especially not superdumps.

Yours faithfully, Bernie Rooney.
