

Re Application by Oxygen Environmental Ltd. for a licence to operate an Integrated Waste Management facility at Carrickare Cavan. Your Ref W0248/01.04 FFR 2009

Dear Sir or Madam,

I wish to object to the granting of such a licence.

1. It is proposed to extend existing facility which is already in a built up residential area close to Cavan Town and has already been causing problems.
2. From your own ongoing reports, bad management & pollution continues, even this weekend the odour continued. Prosecution of Cavan C. Council for breaches of the existing licence seems to be meaningless and a joke.
3. Given the current economic climate householders already living in this devalued neighbourhood face further devaluation of their property should the licence be granted.
4. I live quite close to the sewage treatment facility where leachate is transported to, surely with the increase of buildings in Cavan Town in recent years this sewage facility is inadequate to treat this amount of leachate.
5. In this so called "Green" Country of ours I should be able to open my windows, step out into my garden and enjoy the fresh air in what was a scenic locality where we built our home.

35 years ago. Unfortunately this is not the case, depending on weather conditions we are subjected to the noxious odour that emanates from Comarum and continues despite promises from Oxygen that the problems are being rectified.

How could a company that cannot manage and operate efficiently their present plant be granted a licence to expand and run an Integrated Waste Management facility?

For these reasons I ask the E.P.A to refuse their application for a licence.

Yours faithfully,

Patras' De Couron.
