

Submission no 66

REGASKIN

CAVAN

28<sup>th</sup> Feb 09

Dear Sirs,

Re Application by Oxigen Environmental Ltd, for a licence to operate an Integrated Waste Management Facility at Lisnagrady + Corraun Townlands, Cavan. Your ref:

W0248/01

I refer to the above application & now wish to make the following objection to the grant of the above for the following reasons:

1. the location is inappropriate given its close proximity to Cavan town.
2. It poses a serious health + safety risk & should be closed permanently.

3. When the wind blows in our direction the foul odour penetrates the house even with all the doors & windows closed. It makes me feel ill & very annoyed.
4. I cannot put clothes on the line in case the wind direction changes & I have to bring them in again.
5. I am afraid I won't be able to work in the garden this spring & summer as the odour from the landfill makes me go indoors immediately it comes this direction.
6. We have a business & when visitors come it is very embarrassing when the offices & factory are filled with the foul odour from the landfill.

Corporate landfill should <sup>not</sup> be used  
by anyone + everyone all over  
the country. Let them find landfill  
sites of their own. We have  
had enough + the landfill  
site should be CLOSED.

Yours Sincerely  
Joan Milligan
