Submission no 74

LISDUNUIS

Ballyhaize

Co. CAVAN

Re Application by Oxigen
Environmental LTD for a licence
for Integrated Waste Management
at Lisnagally Carranore
Co. CAVAN Ref W0248/01

This unit has been very badly
run over the years by CAVAN
E.C. and by Oxigen despite
all the promises they have made
The smell from this dump
has been unbearable for a
number of years. Where we
can not hang out clothes
leave windows open or enjoy
a walk in our area
fresh vegetables baked in

from our garden and fruit
from our trees are unusable
because this smell is still
there even after washing.
this place should be closed
down as it has to be a
health hazard, and despite
all promises made by
Carav P.C and Oxigen it
has not improved and
the huge amount of lorries
~~are~~ waiting for it to
open in the mornings and
no check on what they are
carrying is acceptable.
So I call on you the
EPA to refuse to grant
a licence and to push to
have it closed down as
your priority is Environmental
Protection Agency

I think it is time
for you to act on this
matter and to show
that you are an independent
Agency and not a
political football and
in favour of big business
and to act for the
people your set up to
protect
