Environmental Pro. Agency,

Re. Application by Oxigen Env. Ltd. for a licence to operate Integrated Waste Management Facility at Lismagraty & Carranure Townlands Cootchill Rd., Cavan.

At present the smell, depending on weather conditions means I cannot open my windows in my bedroom and adjoining bathroom (which are vented) the smell is quite sickening at night.

I am a grandmother and one of my grand children who is an asthmatic with a lot of allergies lives quite close to the ^{proposed} amenity. He attends Castletara N.S. and this is worrying as to what affect it will have on the children of the area in the future. We have been told the smell is harmless but then we have also had a string of broken promises over the past ten years from Cavan Co. Council and in the past twelve months from Oxigen. At this stage in my life I have no trust in authority and I implore on your better judgement to close the present facility and refuse the application for a licence. Give the people of this area a break and take it elsewhere. My family join me in this request

I remain,

James O'Rourke
Aoelle O'Rourke
Olivier moony
Justin Brady

Yours Faithfully
Brid O'Rourke
