Co. Wexford,

1<sup>st</sup> April 2009

**Re: Environmental Impact Statement (EIS) for Ref Number P0571-03, Millipore  
Ireland B.V., Tullagreen, Carrigtwohill, County Cork.**

Dear Ms Kennedy,

I refer to the recent correspondence relating to the above named Application submitted to the Environmental Health Department of the HSE on the 24<sup>th</sup> March 2009.

This department wishes to make the following comments:

### **Pest Control**

Any major earthworks will pose a risk of pests if mitigation measures are not put in place. A pest control plan should be in place at all times.

### **Water Quality**

Regular monitoring of any possible impact the development will have on ground and surface water in the vicinity must be carried out.

### **Noise**

The main mitigation measures for noise control must be monitored to ensure the daytime construction noise limit is managed and the Waste Water Treatment Plant operates to the specified noise criteria.

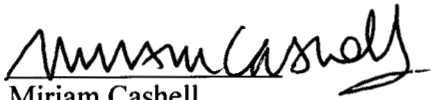

## North Lee Environmental Health

### **Sludge Disposal**

Any agricultural use of sewage disposal should be monitored to ensure there is no adverse effect on the human food chain.

If there are any issues arising from my comments or I can be of any further help please do not hesitate to contact me

Yours Sincerely,

Miriam Cashell

**A/Principal Environmental Health Officer.**
