Re: Application by Oxygen Environmental Ltd, for a licence to operate an integrated Waste Management Facility at Lismagratt and Corranure Townlands, Cavan, Co. Cavan. Your ref: W0248/01

Dear sir/madam,

I refer to the above application and ask that it be denied on the bases that the current waste management facility is already causing major problems for the area and for the people. This dump has to be a serious health hazard as the toxic, chemical-like smell seeps from it everyday and blows at least 3 miles with the wind.

I live approximately 3 miles from the site and am embarrassed by the toxic smell that can be smelt in our garden, caused solely by this dumping ground. I would be afraid to let children play while breathing in such toxic air.

This site is too close to a highly populated area and should under no circumstances be allowed to expand; this site should be closed down instead. It is too close to houses, schools and to Cavan town. It is a disgrace that this is allowed to continue at all.

There have been concerns about the increased risk of cancer and other diseases in the area and I really feel that making it larger could cause these problem to be more widespread. This dumping site is a massive worry to the local people and something needs to be done about it.

Please consider these submissions with a view to what you would do if this was proposed in your back garden.

Regards,
Linda Walshe
