8th July 2009

Dear Ms O'Callaghan,

I wish to acknowledge receipt of the correspondence regarding the sanitary Authority response to an alteration in the Section 99E request regarding a consent to discharge to sewer in relation to the above named premises in respect of emission point SE3 from the above licenced site.

Cork County Council have no objection to the requested increase from the applicant in Sulphate levels to 200mg/l and for an increase of Chloride levels to 250mg/l for SE3 in order to have consistency in the parametric value of Sulphate and Chloride in the discharges to Sewer from the site.

Please be advised that Cork County Council may seek a technical amendment of the provisions in the Section 99(E) upon completion of the wastewater discharge licencing process. Cork County Council has applied to the EPA for a wastewater discharge licence for the agglomeration of Carrigtwohill and the attached consent has been prepared prior to a decision from the agency on the current application.

Should you have any queries or clarification my contact details are supplied below
