10 March 2011

Reg. No. S0002-01

Dear Ms Higgins,

Further to our telephone conversation on the 9th of March, I would like to inform you that radiological analysis was carried out in this area in 2007 in accordance with IAEA-TEC-DOC-1375, *Determining the suitability of materials for disposal at sea under the London Convention 1972: A radiological assessment procedure*. The measurements made were found to be *de minimis*, indicating that the dumping of these materials at sea will not result in a radiological hazard.

There is no requirement on our part to analyse samples on this occasion as the samples analysed previously are sufficient to cover the area of the intended dredging operation.

If you require any further information please do not hesitate to contact us.

Yours sincerely,

Jennie Wong
Radiation Monitoring
