To whom it may concern,

As regards the application from Murphy Environmental for an EPA licence we as a young family in the area wish to lodge our objection to the proposal. We have a 4 month old daughter who should not be subjected to the potential disaster / traffic that this facility could bring to this rural part of North Dublin. The proposed traffic plan is totally unacceptable and puts us all at risk every time we take to the road Monday to Saturday. You may not be aware that the area is very popular with cyclists from all over the city of Dublin and also attracts a lot of people for walks due to the fabulous scenery. If the licence is awarded then the dirt and dust which the trucks will bring will encourage people to go elsewhere for recreational activities as outlined above. Also the damage to the hedges and trees in the area will be significant. It is only now that the beauty of the area has been restored having suffered at the hands of Murphy Quarry for the past 30 years. 30 years we have been subjected to trucks, dust and dirt so that Murphy Quarries could make plenty of money and now that has dried up we are to be subjected to the next get rich quick scheme.

We are also concerned about our water supply which comes from the reservoir right next door to the quarry. All the talk there is about quality of water throughout the country and Murphy Environmental are going to dump dangerous material beside the reservoir.

We feel that our area has become the dumping ground of Dublin and we as the locals are being neglected so that companies such as Murphy Environmental can get what they want. Due we want North Dublin to be the dumping ground of the country for the future.

I hope you will take the above into consideration for the sake of our family and for the sake of one of the most picturesque parts of Dublin.

Regards

Fran, Martina (nee Kennedy) and Ellen Stafford.
