17th October 2011

To The IPPC Licensing division:
Re : License no: P0395-02/03 Pfizer Pharmaceuticals Askeaton.

Dear Sir or Madam,

I wrote to you on the 21st September 2011 with a submission to you on the review of the IPPC License of this operation.

I again wrote to you on the 5th of October to make an official complaint that the noise from the factory was seriously disturbing on two specific dates.

I made the factory management aware of this.

Since then nothing has been done to ensure that noise from the Pfizer plant is being controlled to within tolerable levels.

I wish to inform the agency that I was subjected to horrendous noise on Sunday the 9th and Monday the 10th. On Tuesday the 11th and Wednesday 12th there was terrible noise again, along with a lot of banging noise. Then on Saturday 15th and Sunday the 16th the noise was back up to dreadful levels again.

At this stage I would like to know what the agency intends doing about this situation. This is having an extremely disturbing affect on my quality of life. I do not consider that anyone should have to put up with this. The factory management are totally aware of what they are subjecting me to but do not seem willing to take any meaningful action to reduce the noise levels they emit.

I shall continue to record each incident where I am unreasonably disturbed and report the same to you until such time as someone takes some notice.

Yours sincerely

Declan Prendiville
