Re : IPPC Licence Application – Brandon Products Ltd., Asdee, Co. Kerry
(Ref. No. P0957-01)

Dear Ms. Kennedy,

I refer to your letter of the 26th January, 2012 to the Director of Services (Environmental Services) regarding the above.

We note the fact that an application for IPPC licencing has been submitted by the company in question and wish to comment as follows :

The activity in question has been the subject of considerable levels of complaint from local residents in the past. In particular, these complaints relate to the control and emission of odours from the facility. It has been noted that the company has installed an air handling system within the facility and has made certain changes to the way in which waste material is stored on-site, notwithstanding this however, we have continued to receive complaints from residents in the area about odour issues.

It should also be noted that the management of waste generated at the facility has also been the subject of some discussion with the operators of the facility. The waste cake generated on-site is currently recovered by way of landspreading and it is our opinion that any outlet used in this regard should hold the necessary authorisation under the Waste Management Acts.

Yours sincerely,

Mick Boyce, S.E.E.,
Environment Department.
