Reg. No P0958-01

Re: Application for an Integrated Pollution Prevention and Control licence by Mayo Renewable Power Ltd at Killala Business Park, Tawnaghmore Upper & Tawnaghmore Lower, Killala, Co. Mayo for the operation of combustion installations with a rated thermal input equal to or greater than 50MW.

Dear Ms. Smith,

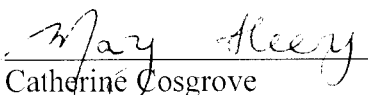

The above IPPC licence application received by this service on 22nd February 2012 has now been considered. The assessment is based on an evaluation of documentation submitted to this office on that date, a site visit conducted on 8th March and a discussion with Ms Fiona Purcell, Engineer with Arup who are Consultant Engineers for the project.

All commitments to future actions in the application, including mitigation and further testing have been taken as read and all data results have been accepted as accurate. No additional measurements were undertaken.

There are no comments to make as a result. However, it is recommended that as Killala is located in a High Radon Area that the issue of Radon as a health issue be addressed when the facility is operational.

All correspondence or any queries with regard to this report including acknowledgment of this report should be forwarded to me at the above address.

Yours sincerely,

Catherine Cosgrove
Principal Environmental Health Officer

Cc Ms Fiona McCormack, PA to Mr Gavin Maguire, Environmental Health Service, HSE, Oak House, Limetree Avenue, Millennium Park, Naas, Co. Kildare.
