Re IPPC Application 738 2

Dear Ms Buckley,

I bring the following facts to the EPA's attention to be dealt with by you or the appropriate person:

The installation of IPPC incense Application 738 2 has been operated and included chemical discharge to the marine environment:

SICOR 2007	Hydrotest cocktail	6.3 tones
Roemex RX-9022	Tracer dye	0.33 tonnes
Methanol	Pipeline drying following dewatering	90 tonnes

I have already brought to the EPA's attention that the above chemicals have not been included in the application documents. I am not aware if the EPA has been informed by the licence applicant of the operation of the installation prior to the granting of the IPPC licence and the details of chemicals or the location of the marine discharge location.

Yours sincerely,

Monica
