**Subject:** Dublin City Council application to dump over 800,000 tonnes of spoil into Dublin Bay over a three year period

To whom it may concern,

I wish to formally object to the application made by Dublin City Council recently to the Environmental Protection Agency (EPA) to dump over 800,000 tonnes of spoil into Dublin Bay over a three year period. I find this application for the granting of a Dumping at Sea Permit to Dublin City Council for the dumping at sea of spoil generated by the proposed Long Sea Outfall Tunnel project outrageous and highly offensive. As a frequent user of the Dublin Bay marine area and as a proud conservationist of Irish native wildlife, I am appalled at the request of Dublin City Council. I kindly request the EPA to consider the consequences of such a proposal very carefully and to do so in direct consultation with the users, residents and business of Dublin Bay who are best placed to represent the native wildlife of the area, all of which will be directly impacted for many generations should this application be granted.

Kind regards,

Karl Rankin
