Dún Laoghaire
fishermans
group

dear sir
it has come to our attention there are plans to dump 900,000 tons of waste earth twice daily outside the burford bank .
May I remind you there are twenty fishermen who make there living sailing from dunleary port , from the piers of d/L out to seaward , areas include the bay of Dublin inside and outside the anchorage , inside the south shipping lane ,inside and outside the burford bank north and south , inside and outside the kish bank , the bay of bray.
we in dunleary fisherman's group are of the opinion that dumping thousands of tons of earth some of it contaminated will have detrimental impact on species we fish from which we earn our livings , we depend on this area to earn a living , from it feed our family's and pay our way
This proposal by Dublin city council will put us out of business.
We in dunleary fisherman's group object most strongly to this proposal to dump this waste on the fishing grounds.
We are all self employed fishermen , we depend on this fishery to make a living , losing it we would not like to contemplate , the dole for us is not a option.
yours sincerely
Bobby Creedon
on behalf of dunleary fisherman's group
