Dear Sir/Madam,

Thank you for referring the above application to An Taisce for comment.

Preliminary information on relevant planning permission compliance and Environmental Protection Agency licence history is inadequate. Current functional operational level for poultry facility is 68,000 birds with a planning capacity of 74,000 for subby to a local processing plant.

Section 5.2.5 raised issue of management of 'dead birds stored in bins on site' which combined with feed store 'will likely lead to sustained or increased vermin population around the city'.

Information is inadequate on existing odour management on site information on mitigation of ammonia emissions is not provided under 'Air Quality Emissions' 5.5.5.2.

Section 5.11.4.1 does not provide information on facility to which poultry litter is to be brought. Accordingly the compliance and operation record of this waste disposal cannot be assessed.

Please acknowledge our submission and advise us of any decision made.

Yours sincerely,

Ian Lumley
