20th June 2013.

Dear Ann.

I wish to include this odour
log as a submission on the website.
The impact this factory has had
on our lives is serious, both
health wise and mentally!

With the past few years we cannot
open windows, doors or go out
to do outside work the days we have
this awful odour! We have been
given numerous excuses and we're
guilted with the past few years, Brandon
Products have actually been telling us
there was no odours, until now
thanks to ourselves.

They have continued to work, and we have continued to suffer.

I have had numerous chest infections just after a course of antibiotics and steroids as my doctor can support.

To-day we have the odour coming in our back door yet again 20/06/13 2.15pm! No one should have to smell this awful odour. It is sickening and not ~~acceptable~~ acceptable.

Gandon Products should be asked to stop production until they have this sorted:

We thank you for your help in trying to sort this problem.

Yours sincerely
Eithne McElgeeth.
