**Re: PL Ref P930/01 - Notification under Section 87(1)(f)(i) of the EPA Acts as amended.**

A Chara,

I refer to your correspondence dated 28<sup>th</sup> August 2013 in respect of the above.

Having reviewed the planning histories associated with these developments I can confirm that the decisions of the Planning Authority were not appealed by any party to An Bord Pleanála. Accordingly the decisions of the Planning Authority were the applicable grants of planning permission relating to these developments.

In respect of the proposed licence(s) as referred to in your respective correspondence please be advised that Monaghan County Council has no objections in respect of Integrated Pollution Prevention and Control Licence(s) being issued in respect of the above development. The Environment Section has recommended the inclusion of specific conditions to be attached to any future licence.

I trust this provides your department with a satisfactory overview of matters relating to this development.

Mise le meas,

  
Bernie McElvaney,  
Senior Staff Officer

## Appendix 1

Copy of conditions suggested by Environment Section:

1. Where land spreading of manure is proposed to take place in County Monaghan, the licensee should submit detailed proposals to the Environment Section of Monaghan County Council for acceptance. Such proposals shall:
  - I. Include location and maps of any offsite storage facility and land banks.
  - II. Demonstrate that sensitive areas including those described in Chapter 4, Section 4.9 of the Monaghan County Development Plan 2013-2019 have been considered.
  - III. Demonstrate that DAFM guidelines on land spreading poultry manure (to include minimisation of disease) and industry best practice on land spreading have been taken into account.
  - IV. Include a nutrient management plan.
2. The site drainage system should be reviewed in relation to new requirements of the Monaghan County Development Plan 2013-2019 (Section 4.9 and Appendix 13 refer) and as minimum effective silt trap(s) shall be incorporated into existing drainage system. In the case of a discharge of storm water to any first order stream with a gravel bed or to higher order streams some form of SUDS in addition to adequate silt trap(s) should be incorporated into existing drainage systems.
