# ENVIRONMENTAL IMPACT STATEMENT

## TABLE OF CONTENTS

### CHAPTER 1 INTRODUCTION

- 1.1 Need for the Proposed Development & Regulatory Background
  - 1.1.1 EPA Support for Anaerobic Digestion
  - 1.1.2 Green House Gas Emissions
  - 1.1.3 Renewable Energy
  - 1.1.4 Nitrates Directive & Regulations
  - 1.1.5 Water Framework Directive
  - 1.1.6 Drinking Water Quality
  - 1.1.7 Animal By-Products Regulations
- 1.2 Planning & Development Policy Context
  - 1.2.1 National Policy Context
    - 1.2.1.1 Sustainable Development - A Strategy for Ireland 1997
    - 1.2.1.2 Changing Our Ways, 1998
    - 1.2.1.3 National Energy and Climate Change Policy
  - 1.2.2 Local Policy Context
    - 1.2.2.1 Westmeath County Development Plan 2008 – 2014
- 1.3 National Waste Report 2009, Conclusions and Recommendations
  - 1.3.1. Municipal Waste
  - 1.3.2 Waste Infrastructure
  - 1.3.3 Progress towards national & EU obligations
  - 1.3.4. Conclusions
  - 1.3.5. Recommendations
- 1.4 Environmental Impact Statement (EIS) Methodology
  - 1.4.1 Requirement for an EIS
  - 1.4.2 EIS Methodology
  - 1.4.3 Contributors to the EIS
- 1.5 Scoping
- 1.6 Letters of Contract

### CHAPTER 2 DESCRIPTION OF PROPOSED DEVELOPMENT

- 2.1 Description of the Development Site
- 2.2 Site History
- 2.3 Characteristics of the project
  - 2.3.1 Description of Design, Size and Scale
    - 2.3.1.1 Administration

- 2.3.1.2 Waste Acceptance
- 2.3.1.3 Process
- 2.3.1.4 Storage
- 2.3.2 Health and Safety
  - 2.3.2.1 General Operational Safety
  - 2.3.2.2 Fire Safety
- 2.4 Operation of the Project
  - 2.4.1 Description of Principal Processes & Activities
  - 2.4.2 Scope of the Project
  - 2.4.3 General Operation
  - 2.4.4 Processes
    - 2.4.4.1 Waste Acceptance
    - 2.4.4.2 Waste Conditioning
    - 2.4.4.3 Waste Processing
    - 2.4.4.4 Hygienisation
    - 2.4.4.5 Biogas Treatment
    - 2.4.4.6 Cogeneration Unit
    - 2.4.4.7 Biofilter and odour control system
  - 2.4.5 Occupants/Staffing
  - 2.4.6 Description of Secondary Process/Activities
    - 2.4.6.1 Off-Site Traffic Movements
    - 2.4.6.2 On-Site Waste/Personnel Movements
    - 2.4.6.3 De-sludging
    - 2.4.6.4 Monitoring
    - 2.4.6.5 Security
  - 2.4.7 Energy
    - 2.4.7.1 Connection to Substation
  - 2.4.8 Other
    - 2.4.8.1 Water
    - 2.4.8.2 Sanitary Services
    - 2.4.8.3 Telecom

## **CHAPTER 3 HUMAN BEINGS**

- 3.1 Introduction
- 3.2 Population
  - 3.2.1 Receiving environment
    - 3.2.1.1 Impacts and Mitigation Measures
    - 3.2.1.2 Census Population
  - 3.2.2 Characteristic of the proposal.
  - 3.2.3 Potential Impact of the proposal
    - 3.2.3.1 Construction Phase
    - 3.2.3.2 Operational Phase
  - 3.2.4 Do Nothing Scenario
  - 3.2.5 Avoidance, remedial or reductive measures
  - 3.2.6 Predicted impact of the proposal

- 3.2.7 Monitoring
- 3.2.8 Reinstatement
- 3.3 Employment
  - 3.3.1 Receiving environment
    - 3.3.1.1 Unemployment
  - 3.3.2 Characteristics of the proposal
    - 3.3.2.1 Construction Phase
    - 3.3.2.2 Operational Phase
  - 3.3.3 Potential Impact of the proposal
  - 3.3.4 Avoidance, remedial or reductive measures
  - 3.3.5 Predicted impact of the proposal
    - 3.3.5.1 Construction Phase
    - 3.3.5.2 Operational Phase
  - 3.3.6 Do Nothing Scenario
  - 3.3.7 Monitoring
  - 3.3.8 Reinstatement
- 3.4 Community Aspects
  - 3.4.1 Receiving environment
    - 3.4.1.1 The resident community
    - 3.4.1.2 The working community
    - 3.4.1.3 The visiting community
    - 3.4.1.4 Characteristics of the proposal
  - 3.4.2 Potential Impact of the proposal
    - 3.4.2.2 Operational Phase
    - 3.4.2.3 The resident community
    - 3.4.2.4 The Working Community
    - 3.4.2.5 The visiting community
  - 3.4.3 Do - Nothing Impact
  - 3.4.4 Avoidance, remedial or reductive measures
  - 3.4.5 Predicted impact of the proposal
  - 3.4.6 Monitoring
  - 3.4.7 Reinstatement
- 3.5 Vermin and Pests Control
  - 3.5.1 Background
    - 3.5.1.1 Responsibilities
  - 3.5.2 Procedures and actions
    - 3.5.2.1 General
    - 3.5.2.2 Chemicals
    - 3.5.2.3 Physical Barriers
    - 3.5.2.4 Cleaning, Sanitation and Housekeeping
  - 3.5.3 Monitoring
  - 3.5.4 Corrective Action
  - 3.5.5 Do Nothing Scenario
  - 3.5.6 Predicted impact of the proposal
  - 3.5.7 Monitoring

3.5.8 Reinstatement

**CHAPTER 4 CLIMATE**

- 4.1 Introduction
- 4.2 General
  - 4.2.1 Wind Speed
  - 4.2.2 Precipitation
- 4.3 Global Climate
  - 4.3.1 Global Warming
  - 4.3.2 Acidification
- 4.4 Potential Impacts of the Proposed Development
  - 4.4.1 Introduction
  - 4.4.2 Construction Phase
  - 4.4.3 Operational Phase
  - 4.4.4 Environmental Benefits of Anaerobic Digestion
- 4.5 Mitigation Measures
  - 4.5.1 Construction Phase
  - 4.5.2 Operational Phase

**CHAPTER 5 AIR QUALITY**

- 5.1 Introduction
  - 5.1.1 Scope of Work
- 5.2 Materials and methods
  - 5.2.1 Dispersion modelling assessment
    - 5.2.1.1 Atmospheric dispersion modelling of air quality: What is dispersion modelling?
    - 5.2.1.2 Atmospheric dispersion modelling of air quality: dispersion model selection
  - 5.2.2 Air quality impact assessment criteria
    - 5.2.2.1 Air Quality Guidelines value for air pollutants
  - 5.2.3 Existing Baseline Air Quality
  - 5.2.4 Meteorological data
  - 5.2.5 Terrain data
  - 5.2.6 Building wake effects
- 5.3 Results
  - 5.3.1. Dispersion model input data – Source characteristics
  - 5.3.2 Process emissions - Volume flow rate and flue gas concentration guarantees
  - 5.3.3 Dispersion modelling assessment
  - 5.3.4 Dispersion model Scenarios
- 5.4. Discussion of results

For inspection purposes only.  
Consent of copyright owner required for any other use.

- 5.4.1 Assessment of air quality impacts for pollutants from proposed emission points AEP1 to AEP3
  - 5.4.1.1 Carbon monoxide – Ref Scenario 1
  - 5.4.1.2 Oxides of nitrogen – Ref Scenario 2 and 3
  - 5.4.1.3 Sulphur dioxide – Ref Scenario 4, 5 and 6
  - 5.4.1.4 Particulate matter – Ref Scenario 7, 8, 9 and 10
  - 5.4.1.5 TNMVOC as Benzene – Ref Scenario 11
  - 5.4.1.6 Odour – Ref Scenario 12

5.5. Conclusions

**CHAPTER 6 NOISE**

- 6.1 Introduction
- 6.2 Study Methodology
- 6.3 Environmental Noise Survey
  - 6.3.1 Measurement Locations
  - 6.3.2 Durations of Survey
  - 6.3.4 Instrumentation and Methodology
  - 6.3.5 Measurement Parameters
- 6.4 Receiving Environment
  - 6.4.1 General Description
  - 6.4.2 Measurement Data
  - 6.4.3 Evaluation of Measurement Data
- 6.5 Characteristics of the Proposed Development
  - 6.5.1 Potential Impacts of the Proposed Development
    - 6.5.1.1 Noise Criteria
    - 6.5.1.2 Construction Phase
    - 6.5.1.3 Operational Phase
- 6.6 Results
- 6.7 Mitigation Measures
  - 6.7.1 Construction Phase
  - 6.7.2 Operational Phase
- 6.8 Predicted Impacts of the Proposed Development
  - 6.8.1 Construction Phase
  - 6.8.2 Operational Phase
- 6.9 Monitoring
- 6.10 Further Information Report

## **CHAPTER 7 SOILS, GEOLOGY and HYDROGEOLOGY**

- 7.1 Introduction
- 7.2 Methodology
  - 7.2.1 Existing Environment
  - 7.2.2 Impact Assessment Methodology
- 7.3 Existing Environment
  - 7.3.1 Background
  - 7.3.2 Receiving Environment
    - 7.3.2.1 Topography
    - 7.3.2.2 Drift Geology
    - 7.3.2.3 Bedrock Geology
    - 7.3.2.4 Hydrology
    - 7.3.2.5 Hydrogeology
- 7.4 Groundwater Vulnerability Assessment
  - 7.4.1 Background
  - 7.4.2 Methodology
    - 7.4.2.1 Desk Study
    - 7.4.2.2 Field Work
    - 7.4.2.3 Reporting
  - 7.4.3 Resource Protection Zone
  - 7.4.4 Ground Water Protection Responses
  - 7.4.5 Conclusion
- 7.5 Environmental Impacts
  - 7.5.1 Construction Phase Impacts
    - 7.5.1.1 Drift Geology & Topography
    - 7.5.1.2 Bedrock Geology
    - 7.5.1.3 Hydrology and Hydrogeology
  - 7.5.2 Operational Phase Impacts
    - 7.5.2.1 Topography, Drift & Bedrock Geology
    - 7.5.2.2 Hydrology and Hydrogeology
  - 7.5.3 'Do Nothing' Impact
  - 7.5.4 "Worst-Case Scenario" Impact
- 7.6 Mitigation Measures
  - 7.6.1 Construction Phase
  - 7.6.2 Operational Phase
- 7.7 Residual Impacts

## **CHAPTER 8 CULTURAL HERITAGE**

- 8.1 Introduction
  - 8.1.1 General

- 8.1.2 The Development
- 8.1.3 Definitions
- 8.1.4 Project Team
- 8.1.5 Consultations
  
- 8.2 Baseline Environmental Study
  - 8.2.1 Methodology
  - 8.2.2 Paper Survey
  - 8.2.3 Field Inspection
  
- 8.3 Results and Analysis – Archaeology
  - 8.3.1 Archaeological and Historical Background
  - 8.3.2 Summary of Previous Archaeological Fieldwork
  - 8.3.3 Cartographic Analysis
  - 8.3.4 County Development Plan
  - 8.3.5 Aerial Photographic Analysis
  - 8.3.6 Field Inspection
  - 8.3.7 Conclusions
  
- 8.4 Results and Analysis – Cultural Heritage
  - 8.4.1 Place name Analysis
  - 8.4.2 Townlands
  - 8.4.3 Cultural Heritage Sites
  - 8.4.4 Conclusions
  
- 8.5 Assessment of Potential Impacts
  - 8.5.1 Potential Impacts
    - 8.5.1.1 Archaeology
    - 8.5.1.2 Cultural Heritage
  - 8.5.2 Do nothing impact
  - 8.5.3 Worst case impact
  
- 8.6 Recommendations and Mitigation Measures
  - 8.6.1 Impacts
    - 8.6.1.2 Archaeology
    - 8.6.1.3 Cultural Heritage
  - 8.6.2 Monitoring

## **CHAPTER 9 ECOLOGY**

- 9.1 Introduction
  
- 9.2 Methodology
  
- 9.3. The Existing / Receiving Environment
  - 9.3.1 Fields
  - 9.3.2 Field Boundaries
  - 9.3.3 Adjacent Habitats

- 9.4 Fauna
- 9.5 Evaluation
- 9.6 Impact of Development
  - 9.6.1 Appropriate Assessment
- 9.7 Mitigation Measures

## **CHAPTER 10 – MATERIAL ASSETS**

- 10.1 Introduction
- 10.2 Methodology
- 10.3 Land Use and Ownership
- 10.4 Local Settlement
- 10.5 Electricity Supply
- 10.6 Gas Supply
- 10.7 Road Network
- 10.8 Water Supply & Usage
  - 10.8.1 Process Water
  - 10.8.2 Potable Water
  - 10.8.3 Fire Water/ Water Storage Tank
  - 10.8.4 Foul Water
  - 10.8.5 Surface Water
- 10.9 Waste Management
  - 10.9.1 Construction Phase
  - 10.9.2 Operational Phase
- 10.10 Site Utilities
- 10.11 Agriculture
- 10.12 Mitigation Measures
- 10.13 Residual Impacts

## **CHAPTER 11 – LANDSCAPE AND VISUAL IMPACT**

- 11.1 Receiving Environment

For inspection purposes only.  
Consent of copyright owner required for any other use.

- 11.1.1 Introduction
- 11.1.2 Methodology
- 11.2 Existing Conditions
  - 11.2.1 Topography
  - 11.2.2 Slope Regime
  - 11.2.3 Vegetation
  - 11.2.4 Land Use
  - 11.2.5 Visual Analysis
- 11.3 Characteristics of the Proposed Development
- 11.4 Potential Impact of the Proposed Development
  - 11.4.1 Impact on Landscape Character
  - 11.4.2 Impact on Views
  - 11.4.3 Impact on Visual / Recreational Amenity
- 11.5 Mitigation Measures
- 11.6 Predicted Impact of Proposal
- 11.7 Residual Impacts / Monitoring
- 11.8 Summary

## **CHAPTER 12 – ROADS AND TRAFFIC**

- 12.1 Introduction
- 12.2 Structure of Report
- 12.3 Methodology
- 12.4 The Development Proposal
- 12.5 Existing Traffic Conditions
  - 12.5.1 Existing Traffic Flows
  - 12.5.2 Existing Road Network
- 12.6 Future Road and Transport Proposals for Public Road
  - 12.6.1 Road and Transport Network Improvements
- 12.7 Trip Generation and Distribution
  - 12.7.1 Traffic Generation
  - 12.7.2 Traffic Impact
- 12.8 Road Safety
- 12.9 Environmental Impact

*For inspection purposes only.  
Consent of copyright owner required for any other use.*

- 12.10 Internal Road Layout and Site Access
- 12.11 Sustainable Transport, Public Transport Provision
- 12.12 Conclusions

## **CHAPTER 13 – ALTERATIVE SITES**

- 13.1 Introduction
- 13.2 Alternatives Examined
  - 13.2.1 Alternative Processes
  - 13.2.2 Alternative Locations
    - 13.2.2.1 Option 1 – Access from Killucan Road Newdown, The Downs, Mullingar
    - 13.2.2.2 Option 2 – Access from the proposed new Killucan/ N4 Grade Separation, Newdown, The Downs, Mullingar
    - 13.2.2.3 Option 3- Access from N4, Newdown, The Downs, Mullingar
  - 13.2.3 Alternative Designs
    - 13.2.3.1 Temperature
    - 13.2.3.2 System
    - 13.2.3.3 Feedstock
  - 13.2.4 Preferred Process, Location and Design
    - 13.2.4.1 Process
    - 13.2.4.2 Location
    - 13.2.4.3 Design

## **CHAPTER 14 – INTERACTION OF THE FOREGOING**

- 14.1 Introduction
- 14.2 Significance of Potential Impacts

For inspection purposes only.  
Consent of copyright owner required for any other use.

## LIST OF TABLES

Table 2.1:	Accepted Waste Types
Table 2.2:	CHP Characteristics
Table 3.1:	Surrounding Land Use
Table 3.2:	Population Statistics for Mullingar and surrounding Area 2002 and 2006
Table 3.3:	Unemployment figures according to area for 2006
Table 4.1	Wind Speed Data for Mullingar Meteorological Station (1961–1990)
Table 4.2	Rainfall Data for Mullingar Meteorological Station (1961–1990)
Table 5.1.	EU and Irish Limit values set out in the SI 271 of 2002, CAFÉ directive 2008/50/EC, H4 Guidance documents Parts 1 and 2 and AG4 guidance document.
Table 5.2.	Baseline air quality data used to assess air quality impact criterion in a number of Zone D region – Navan and Kilkitt.
Table 5.3.	Source characteristics for proposed emission points AEP1 to AEP3.
Table 5.4.	Emission values from exhaust stack of the emission source AEP1.
Table 5.5.	Emission values from exhaust stack of the emission source AEP2.
Table 5.6.	Emission values from exhaust stack of the emission source AEP3.
Table 5.7.	Predicted ground level concentrations for various averaging periods for proposed emission points AEP1 to AEP3 for each pollutant at or beyond the boundary of the facility.
Table 5.8.	Comparison between predicted GLC's + baseline national air quality data and limit values
Table 5.9.	Predicted ground level concentration (excluding baseline) of each pollutant at each identified sensitive receptor locations Rec 1 to Rec 24 for Scenarios 1 to 8
Table 6.1:	Monitoring Locations
Table 6.2:	Daytime Noise Measurement Data
Table 6.3:	Daytime Noise Sources
Table 6.4:	Night-time Noise Measurement Data
Table 6.5:	Night-time Noise Sources
Table 6.6:	Construction Noise Limits
Table 6.7:	Allowable Peak Particle Velocity at the Closest Part of any Sensitive Receptor
Table 6.8:	Likely impact associated with change in ambient noise level
Table 6.9:	Typical Noise Levels at nearest sensitive location during Construction Phase
Table 6.10:	Estimated accuracy for broadband noise of LAT(DW)
Table 6.11:	Sound Power Levels utilised in noise model
Table 6.12:	Details of Receiver Locations
Table 6.13:	Daytime Predicted Noise Levels at Noise Sensitive Locations
Table 6.14:	Night-Time Predicted Noise Levels at Noise Sensitive Locations
Table 6.15:	Predicted Noise levels and Impact at Sensitive Locations Daytime
Table 6.16:	Predicted Noise levels and Impact at Sensitive Locations Night-time

Table 7.1:	Geology and Groundwater Sensitivity
Table 7.2:	Definition of Magnitude of Impacts Criteria
Table 7.3:	Assessment of Significant Criteria for Impacts on Geology & Groundwater.
Table 7.4:	Description of Receiving Waters
Table 7.5:	Summary of Sampling Requirements
Table 7.6:	Matrix of Resource Protection Zones from EPA Guidance Notes on Groundwater Protection
Table 7.7:	Groundwater Protection Responses

Table 12.1:	Traffic Generated Data- Initial Base Assumptions
Table 12.2:	Delivery of non-hazardous waste to AD facility
Table 12.3:	Associated staff traffic levels generated by the proposed development
Table 12.4:	Proposed total daily traffic generated by the development
Table 12.5:	Assumptions based to calculate AM and PM Peak flows from development
Table 12.6:	Break down of vehicular types for peak hour traffic
Table 12.7:	Trip rate for Traffic removing waste material from facility
Table 12.8:	Total 'Worst Case Scenario' traffic generated from proposed development
Table 12.9:	Capacity Test Results for Scenario 1
Table 12.10:	Capacity test results for proposed junctions, Scenario 2
Table 12.11:	Capacity test results for proposed junctions, Scenario 2
Table 12.12:	Capacity test results for proposed junctions, Scenario 2
Table 12.13:	Capacity test results for proposed junctions, Scenario 3 (Do Nothing)
Table 12.14:	Capacity test results for proposed junctions, scenario 3 (Do Nothing Scenario)
