IRISH ARTS REVIEW
The Perfect XMas Gift!
Back now on 01-637 9507

The development will simultaneously consist of the development of a peat deposition site of 117 ha, approximately, at the Srahmore site. The development of the peat deposition site will consist of: the construction of a hardstanding peat reception area of 5,112 sq m, approximately; the provision of a temporary administration building with a gross floor area of 108 sq m, approximately, inclusive of offices, canteen and toilets. The development of the peat deposition site will also consist of: the provision of a new entrance and access road to the peat deposition site from the R313; the construction of internal circulation routes; the construction of a surface water swale along the southern and western boundaries of the site; the provision of 5 no. surface water settlement ponds (2 no. ponds of 800 sq m each; 3 no. ponds of 400 sq m each, approximately). Deposition of peat will take place within an area of 63 hectares approximately. The peat deposition site will also entail the provision of a controlled overflow area of 12 hectares approximately; an oil interceptor; a settlement tank of 28 cubic metres approximately; the provision of a temporary weighbridge and a temporary wheelwash. The development of the peat deposition site will also consist of 5 no. car parking spaces located adjacent to the administration building and 20 no. parking spaces for haulage vehicles at the peat reception area. X

The proposed development at the Srahmore site requires a waste licence under the provisions of The Waste Management Acts 1996 to 2003 and the Waste Management (Licensing) Regulations 2000.

An Environmental Impact Statement in respect of the development at the Bellagally South Site and the Ballymore Site will be submitted to the planning authority with the application. The Environmental Impact Statement will be available for inspection or purchase at a fee not exceeding the reasonable cost if making a copy during office hours at the offices of the planning authority. The planning application may be inspected or purchased at the offices of Mayo County Council, Aras an Chontae, The Mall, Castlebar, County Mayo, during office hours from 9.00 a.m. to 1.00 p.m. and 2.00 p.m. to 5.00 p.m. (Monday - Friday). A submission or observation in relation to the application may be made to the authority in writing on payment of the prescribed fee of €20 within the period of 5 weeks beginning on the date of receipt by the authority of the application.

**PLANNING
APPLICATIONS**
DUBLIN CITY COUNCIL
Anthony L. Byrne is applying for
a mixed used development at
135 - 141 Francis Street 72
135 - 141 Francis Street 72
Dublin 8. The proposed
development includes the demo-
lition of the Tivoli Theatre and
the construction of 130 residen-
tial units, a licensed the-
atre, a cinema and a basement
carparking spaces to ancillary ser-
vices, in addition to ancillary ser-
vices. The residential element
comprises 130 residential units,
units 82 no. are 3-bedroom
units and 35 no. are 1-bedroom
units, with a gross floor area of
13,062 sq metres. The retail
floor area amounts to 196 sq
metres. The office floor area
amounts to 1296 sq metres. The
theatre/venue floor area
amounts to 1296 sq metres.
The foyer/bar and entrance/ex-
it, theatre music and opera
includes the following elements:
Block A - 4-storey fronting Fran-
cis Street to include retention of
the existing facade with office
use at ground and first floor lev-
els and retail use at second, third and
fourth floor levels.

OLIVIA DANIELLE
ATHLONE

Mayo County Council - Shell E&P Ireland Limited intends to apply for permission for development a site of 160 ha, approximately, in the townland of Bellagelley South, Bellanaboy Bridge, County Mayo, and a site of 117 ha, approximately, in the townlands of Srahmore and Attavally, Bangor-Erris, County Mayo for the development of a gas terminal for the reception and separation of gas from the Corrib Gas Field and for a peat deposition site, respectively.

The development will consist of the concurrent development of two sites located 11 kilometres apart approximately, and identified as the site of the gas terminal for the reception and separation of gas from the Corrib Gas Field in the townland of Bellagelley South, Bellanaboy Bridge, County Mayo (the Bellagelley South site) and the site of the peat deposition site in the townlands of Srahmore and Attavally, Bangor-Erris, County Mayo (the Srahmore site), respectively.

The development at the Bellagelley South site will consist of: a gas terminal for the reception and separation of gas including plant and equipment; provision of 4,935 sq m (gross floor area), approximately, of buildings; access roads; 40 no. car parking spaces; and ancillary developments, of which 13 ha, approximately, will be developed in respect of the gas terminal's footprint. The proposed development of the Bellagelley South site will also consist of: the excavation and removal of 450,000 cubic metres, approximately, of peat from the Bellagelley South site, off site, to the Srahmore site; civil works, inclusive of foundations and piling; the provision of a single storey control building with a gross floor area of 400 sq m, approximately, inclusive of a control room, offices, equipment rooms, kitchenette, locker room and toilets; the provision of a single storey administration building with a gross floor area of 1,015 sq m, approximately, inclusive of a gatehouse, offices, a conference room and an emergency response room; canteen, kitchenette, laboratory, archive room, first aid room, store rooms, lockers, changing rooms and toilets; the provision of a maintenance building with a gross floor area of 800 sq m, inclusive of a warehouse, stores, mechanical workshop, welding and fabrication shop, instruments and electrical workshops, a plant room, toilets and a maintenance vehicle shed; a weighbridge; and a lattice antenna structure of 22 m in height, approximately, for site-wide radio communications. The development of the Bellagelley South site will also consist of: a diesel storage tank of 75 cubic metres capacity, approximately; a nitrogen generation unit; an air compressor package; a utility area (for plant); a power generation and switchroom building with a gross floor area of 525 sq m, approximately, for the production of electricity for the proposed gas terminal, to include 3 no. generator sets each with a capacity of 1.3 MW; an emergency generator with a capacity of 650kW; 1 no. emergency generator diesel day-tank and 1 no. diesel distribution pump; a high pressure and low pressure flare tower of some 40 m in height, approximately; a ground flare with a stack height of some 12 m, approximately; a transformer building with a gross area of 410 sq m, approximately, to include a 400v switchroom; a heating medium heater with a stack height of 20 m, approximately; 3 no. flare knock out drums; 2 no. low pressure gas compressors; a methanol recovery system comprising of 1 no. methanol still of 33 m in height, approximately; a heating medium storage tank with a capacity of 40 cubic metres, approximately; a sales gas compressor building with a gross floor area of 890 sq m, approximately, to include 2 no. sales gas compressors, each with a 7.7 MW ISO rated gas turbine driver; a gas-to-gas heat exchanger; a corrugated plate interceptor; effluent feed/treated water sumps; a water treatment building with a gross floor area of 235 sq m, approximately, containing a multi-media filter, ultrafiltration and nanofiltration membrane units, ion exchange beds, an activated carbon filter and a sludge treatment facility; 3 no. condensate storage tanks, of 10 m each in height, approximately, and 10 m each in diameter, approximately; 2 no. product methanol tanks of 8.4 m each in diameter, approximately, and 10 m each in height, approximately; 3 no. raw methanol storage tanks 13.5 m each in diameter, approximately, and 10 m high, approximately; a fire water pond with a capacity of 7,200 cubic metres, approximately; a used firewater pond with a capacity of 5,000 cubic metres, approximately; a firewater pump building with a gross floor area of 660 sq m, approximately, to include 4 no. fire water pumps, each with capacity of 600 cubic metres per hour, approximately, and 4 no. diesel engine drivers, each rated at 265kW (absorbed), approximately; a finger type Slug Catcher; an inlet pig receiver with a withdrawal footprint of 15 sq m, approximately; a sales gas metering unit with a footprint of 200 sq m, approximately; an odorant tank with a capacity of 10 cubic metres, approximately; a sales gas pig launcher with a loading / withdrawal footprint of 15 sq m, approximately; an Onshore Terminal Termination Unit (OTTU) measuring 2 m long by 1 m wide by 2.5 m high, approximately; an electricity substation; a Road Tanker Loading / Unloading area; a waste storage area occupying an area of 990 sq m, approximately; the provision of a number of pipetracks and piperacks joining elements of plant together; the provision of 2 no. settlement ponds and associated drainage arrangements; landscaping works; stock proof fencing around the perimeter of the proposed development; security fencing around the terminal and settlement ponds inside the stock proof fence; paved internal access roads; provision of vehicular access to the R314 via an improved forestry access road and the provision of entrance walls and gates; the reconfiguration of the existing entrance from the site to the R314 to include the widening of the entrance and the provision of a deceleration lane; realignment of the R314 to the south of its current location, at the site entrance, over a length of 115 m, approximately, to the west of the centreline of the existing site entrance and over a length of 80 m, approximately, to the east of the centreline of the existing site entrance (over a total length of 195 m, approximately); an emergency vehicular access road to the county road running between Pollatomish and the R314 via; an improved forestry access road; a new maintenance access and maintenance road from the R314 to the 2 no. settlement ponds; and all other site development works and landscaping above and below ground.

gross floor area of 660 sq m, approximately, to include 4 no. fire water pumps, each with capacity of 600 cubic metres per hour, approximately, and 4 no. diesel engine drivers, each rated at 265kW (absorbed), approximately; a finger type Slug Catcher; an inlet pig receiver with a withdrawal footprint of 15 sq m, approximately; a sales gas metering unit with a footprint of 200 sq m, approximately; an odorant tank with a capacity of 10 cubic metres, approximately; a sales gas pig launcher with a loading / withdrawal footprint of 15 sq m, approximately; an Onshore Terminal Termination Unit (OTTU) measuring 2 m long by 1 m wide by 2.5 m high, approximately; an electricity substation; a Road Tanker Loading / Unloading area; a waste storage area occupying an area of 990 sq m, approximately; the provision of a number of pipetracks and piperacks joining elements of plant together; the provision of 2 no. settlement ponds and associated drainage arrangements; landscaping works; stock proof fencing around the perimeter of the proposed development; security fencing around the terminal and settlement ponds inside the stock proof fence; paved internal access roads; provision of vehicular access to the R314 via an improved forestry access road and the provision of entrance walls and gates; the reconfiguration of the existing entrance from the site to the R314 to include the widening of the entrance and the provision of a deceleration lane; realignment of the R314 to the south of its current location, at the site entrance, over a length of 115 m, approximately, to the west of the centreline of the existing site entrance and over a length of 80 m, approximately, to the east of the centreline of the existing site entrance (over a total length of 195 m, approximately); an emergency vehicular access road to the county road running between Pollatomish and the R314 via; an improved forestry access road; a new maintenance access and maintenance road from the R314 to the 2 no. settlement ponds; and all other site development works and landscaping/above and below ground.

The development will simultaneously consist of the development of a peat deposition site of 117 ha, approximately, at the Srahmore site. The development of the peat deposition site will consist of: the construction of a hardstanding peat reception area of 5,112 sq m, approximately; the provision of a temporary administration building with a gross floor area of 108 sq m, approximately, inclusive of offices, canteen and toilets. The development of the peat deposition site will also consist of: the provision of a new entrance and access road to the peat deposition site from the R313; the construction of internal circulation routes; the construction of a surface water swale along the southern and western boundaries of the site; the provision of 5 no. surface water settlement ponds (2 no. ponds of 800 sq m each; 3 no. ponds of 400 sq m each, approximately). Deposition of peat will take place within an area of 63 hectares approximately. The peat deposition site will also entail the provision of a controlled overflow area of 12 hectares approximately; an oil interceptor; a settlement tank of 28 cubic metres approximately; the provision of a temporary weighbridge and a temporary wheelwash. The development of the peat deposition site will also consist of 5 no. car parking spaces located adjacent to the administration building and 20 no. parking spaces for haulage vehicles at the peat reception area.

The proposed development at the Bellagelly South site comprises an activity in relation to which an Integrated Pollution Prevention and Control Licence under the Environmental Protection Agency Acts, 1992 and 2003, is required. Allied to this, Articles 6 & 7 of the European Communities Control of Major Accident Hazards (Involving Dangerous Substances) Regulations, 2000 apply to the proposed development at the Bellagelly South site.

The proposed development at the Srahmore site requires a waste licence under the provisions of The Waste Management Acts 1996 to 2003 and the Waste Management (Licensing) Regulations 2000.

An Environmental Impact Statement in respect of the development at the Bellagelly South Site and the Srahmore Site will be submitted to the planning authority with the application. The Environmental Impact Statement will be available for inspection or purchase at a fee not exceeding the reasonable cost of making a copy during office hours at the offices of the planning authority. The planning application may be inspected or purchased at the offices of Mayo County Council, Aras an Chontae, The Mall, Castlebar, County Mayo, during office hours from 9.00 a.m. to 1.00 p.m. and 2.00 p.m. to 5.00 p.m. (Monday - Friday). A submission or observation in relation to the application may be made to the authority in writing on payment of the prescribed fee of €20 within the period of 5 weeks beginning on the date of receipt by the authority of the application.

**PLANNING
APPLICATIONS**

DUBLIN CITY COUNCIL
Anthony L. Byrne is applying for
a mixed use development at
135 - 143 Francis Street & 72
Thomas Street (Protected Struc-
ture), Dublin 8. The proposed
development includes the demoli-
tion of the existing two storey
and the construction of 130 resi-
dential units, a licensed the-
atre/venue and 64 no.
carparking spaces at basement
level, in addition to licensed ser-
vices and site development
works. The residential element
comprises 130 residential units,
of which 3 no. are 3-bedroom
units, 92 no. are 2-bedroom
units and 35 no. are 1-bedroom
units with a gross floor area of
13,062 sq metres. The retail
floor area amounts to 190 sq
metres. The office floor area
amounts to 252 sq metres. The
theatre/venue floor area
amounts to 1296 (of which 875
is in the basement) sq metres.
The foyer/bar and entrance
to Theatre Venue amount to
110 sq metres. Proposal
includes the following elements:
Block A - 4-storey fronting Fran-
cis Street to include retention of
the existing facade with office
use at ground and first floor lev-
els, residential use at second
and third floor levels.
Block B - 5-storey fronting Fran-
cis Street with commercial/office
use at ground level and resi-
dential use at first, second, third
and fourth floor levels.
Block C - Part 6-storey and part
13-storey tower/feature building
with residential use on all levels.
Blocks D, E and F - 7-storey
blocks with residential use on all
levels.
Block G - change of use at
ground and first floor areas of
protected structure at No. 72
Thomas Street to foyer/bar and
entrance/exit to licensed the-
atre/venue. Existing office use
above first floor level to remain.
Block H - double, height, space,
theatre/venue over basement
and ground floor levels.
Entrance/exit to theatre/venue is
via No. 72 Thomas Street.
Entrance/exit to residential units
from basement carpark is via
Francis Street. This planning
application may be inspected or
purchased at the office of the
Planning Department, Dublin
City Council, Civic Offices,
Wood Quay, Dublin 8. A sub-
mission/observation may be
made in writing to the Planning
Authority on payment of the pre-
scribed fee of €20 within 5
weeks from the date of receipt
of the planning application.

**WESTMEATH COUNTY COUN-
CIL** - We Midland Contractors
Ltd. intend to apply to West-
meath County Council for plan-
ning permission for development
at this site, Tullamore Road,
Kilbeggan, Co. Westmeath. The
development will consist of two
hundred and sixty two fully ser-
viced dwellings containing one
hundred and twenty eight num-
ber 4 bedroom two storey semi-
detached houses (House Type
A), thirty number 3 bedroom two
storey semi detached houses
(House Type B) thirty four num-
ber 3 bedroom two storey town
houses (House Type C), seven
number two storey 3 bedroom
detached houses (House Type
D1), thirty two number two storey
3 bedroom semi detached
corner houses (House Type D2),

South site) and the site of the peat deposition site in the townlands of Srahmore and Attavall
Erris, County Mayo (the Srahmore site), respectively.

The development at the Bellagelly South site will consist of: a gas terminal for the reception and separation of gas including plant and equipment; provision of 4,935 sq m (gross floor area), approximately, of buildings; access roads; 40 no. car parking spaces; and ancillary developments, of which 13 ha, approximately, will be developed in respect of the gas terminal's footprint. The proposed development of the Bellagelly South site will also consist of: the excavation and removal of 450,000 cubic metres, approximately, of peat from the Bellagelly South site, off site, to the Srahmore site; civil works, inclusive of foundations and piling; the provision of a single storey control building with a gross floor area of 400 sq m, approximately, inclusive of a control room, offices, equipment rooms, kitchenette, locker room and toilets; the provision of a single storey administration building with a gross floor area of 1,015 sq m, approximately, inclusive of a gatehouse, offices, a conference room and an emergency response room, canteen, kitchenette, laboratory, archive room, first aid room, store rooms, lockers, changing rooms and toilets; the provision of a maintenance building with a gross floor area of 800 sq m, inclusive of a warehouse, stores, mechanical workshop, welding and fabrication shop, instruments and electrical workshops, a plant room, toilets and a maintenance vehicle shed; a weighbridge; and a lattice antenna structure of 22 m in height, approximately, for site-wide radio communications. The development of the Bellagelly South site will also consist of: a diesel storage tank of 75 cubic metres capacity, approximately; a nitrogen generation unit; an air compressor package; a utility area (for plant); a power generation and switchroom building with a gross floor area of 525 sq m, approximately, for the production of electricity for the proposed gas terminal, to include 3 no. generator sets each with a capacity of 1.3 MW; an emergency generator with a capacity of 650kW; 1 no. emergency generator diesel day-tank and 1 no. diesel distribution pump; a high pressure and low pressure flare tower of some 40 m in height, approximately; a ground flare with a stack height of some 12 m, approximately; a transformer building with a gross area of 410 sq m, approximately, to include a 400v switchroom; a heating medium heater with a stack height of 20 m, approximately; 3 no. flare knock out drums; 2 no. low pressure gas compressors; a methanol recovery system comprising of 1 no. methanol still of 33 m in height, approximately; a heating medium storage tank with a capacity of 40 cubic metres, approximately; a sales gas compressor building with a gross floor area of 890 sq m, approximately, to include 2 no. sales gas compressors, each with a 7.7 MW ISO rated gas turbine driver; a gas-to-gas heat exchanger; a corrugated plate interceptor; effluent feed/treated water sumps; a water treatment building with a gross floor area of 235 sq m, approximately, containing a multi-media filter, ultrafiltration and nanofiltration membrane units, ion exchange beds, an activated carbon filter and a sludge treatment facility; 3 no. condensate storage tanks, of 10 m each in height, approximately, and 10 m each in diameter, approximately; 2 no. product methanol tanks of 8.4 m each in diameter, approximately, and 10 m each in height, approximately; 3 no. raw methanol storage tanks 13.5 m each in diameter, approximately, and 10 m high, approximately; a fire water pond with a capacity of 7,200 cubic metres, approximately; a used firewater pond with a capacity of 5,000 cubic metres, approximately; a firewater pump building with a gross floor area of 660 sq m, approximately, to include 4 no. fire water pumps, each with capacity of 600 cubic metres per hour, approximately, and 4 no. diesel engine drivers, each rated at 265kW (absorbed), approximately; a finger type Slug Catcher; an inlet pig receiver with a withdrawal footprint of 15 sq m, approximately; a sales gas metering unit with a footprint of 200 sq m, approximately; an odorant tank with a capacity of 10 cubic metres, approximately; a sales gas pig launcher with a loading / withdrawal footprint of 15 sq m, approximately; an Onshore Terminal Termination Unit (OTTU) measuring 2 m long by 1 m wide by 2.5 m high, approximately; an electricity substation; a Road Tanker Loading / Unloading area; a waste storage area occupying an area of 990 sq m, approximately; the provision of a number of pipetracks and piperacks joining elements of plant together; the provision of 2 no. settlement ponds and associated drainage arrangements; landscaping works; stock proof fencing around the perimeter of the proposed development; security fencing around the terminal and settlement ponds inside the stock proof fence; paved internal access roads; provision of vehicular access to the R314 via an improved forestry access road and the provision of entrance walls and gates; the reconfiguration of the existing entrance from the site to the R314 to include the widening of the entrance and the provision of a deceleration lane; realignment of the R314 to the south of its current location, at the site entrance, over a length of 115 m, approximately, to the west of the centreline of the existing site entrance and over a length of 80 m, approximately, to the east of the centreline of the existing site entrance (over a total length of 195 m, approximately); an emergency vehicular access road to the county road running between Pollatomish and the R314 via; an improved forestry access road; a new maintenance access and maintenance road from the R314 to the 2 no. settlement ponds; and all other site development works and landscaping above and below ground.

The development will simultaneously consist of the development of a peat deposition site of 117 ha, approximately, at the Srahmore site. The development of the peat deposition site will consist of: the construction of a hardstanding peat reception area of 5,112 sq m, approximately; the provision of a temporary administration building with a gross floor area of 108 sq m, approximately, inclusive of offices, canteen and toilets. The development of the peat deposition site will also consist of: the provision of a new entrance and access road to the peat deposition site from the R313; the construction of internal circulation routes; the construction of a surface water swale along the southern and western boundaries of the site; the provision of 5 no. surface water settlement ponds (2 no. ponds of 800 sq m each; 3 no. ponds of 400 sq m each, approximately). Deposition of peat will take place within an area of 63 hectares approximately. The peat deposition site will also entail the provision of a controlled overflow area of 12 hectares approximately; an oil interceptor; a settlement tank of 28 cubic metres approximately; the provision of a temporary weighbridge and a temporary wheelwash. The development of the peat deposition site will also consist of 5 no. car parking spaces located adjacent to the administration building and 20 no. parking spaces for haulage vehicles at the peat reception area.

The proposed development at the Bellagelly South site comprises an activity in relation to which an Integrated Pollution Prevention and Control Licence under the Environmental Protection Agency Acts, 1992 and 2003, is required. Allied to this, Articles 6 & 7 of the European Communities Control of Major Accident Hazards (Involving Dangerous Substances) Regulations, 2000 apply to the proposed development at the Bellagelly South site.

The proposed development at the Srahmore site requires a waste licence under the provisions of The Waste Management Acts 1996 to 2003 and the Waste Management (Licensing) Regulations 2000.

An Environmental Impact Statement in respect of the development at the Bellagelly South Site and the Srahmore Site will be submitted to the planning authority with the application. The Environmental Impact Statement will be available for inspection or purchase at a fee not exceeding the reasonable cost of making a copy during office hours at the offices of the planning authority. The planning application may be inspected or purchased at the offices of Mayo County Council, Aras an Chontae, The Mall, Castlebar, County Mayo, during office hours from 9.00 a.m. to 1.00 p.m. and 2.00 p.m. to 5.00 p.m. (Monday - Friday). A submission or observation in relation to the application may be made to the authority in writing on payment of the prescribed fee of €20 within the period of 5 weeks beginning on the date of receipt by the authority of the application.

**PLANNING
 APPLICATIONS**
DUBLIN CITY COUNCIL
 Anthony L. Byrne is applying for
 a mixed use development at
 135 - 143 Francis Street & 72
 Thomas Street (Protected Struc-
 ture). Dublin 8. The proposed
 development includes: the demo-
 lition of the Tivoli Theatre and
 the construction of 140 residen-
 tial units, a five storey the-
 atre/venue and 64 no.
 carparking spaces a basement
 level, in addition to ancillary ser-
 vices and site development
 works. The residential element
 comprises 130 residential units,
 of which 3 no. are 3-bedroom
 units, 82 no. are 2-bedroom
 units and 35 no. are 1-bedroom
 units, with a gross floor area of
 13,062 sq metres. The retail
 floor area amounts to 196 sq
 metres. The office floor area
 amounts to 252 sq metres. The
 theatre/venue floor area
 amounts to 1296 (of which 875
 is in the basement) sq metres.
 The foyer/bar and entrance/exi-
 t to Theatre Venue amounts to
 110 sq metres. Proposal
 includes the following elements:
 Block A - 4-storey fronting Francis
 Street with commercial/office
 use at ground level and residen-
 tial use at first, second, third and
 fourth floor levels.
 Block B - 5-storey fronting Francis
 Street with commercial/office
 use at ground level and residen-
 tial use at first, second, third and
 fourth floor levels.
 Block C - Part 6-storey and part
 11-storey tower/feature building
 with residential use in all levels
 above first floor level to remain.
 Block D - 5-storey fronting Francis
 Street with commercial/office
 use at ground level and residen-
 tial use at first, second, third and
 fourth floor levels.
 Block E - 5-storey fronting Francis
 Street with commercial/office
 use at ground level and residen-
 tial use at first, second, third and
 fourth floor levels.
 Block F - 5-storey fronting Francis
 Street with commercial/office
 use at ground level and residen-
 tial use at first, second, third and
 fourth floor levels.
 Block G - change of use at
 ground and first floor areas of
 protected structure at No. 72
 Thomas Street to cinema/the-
 atre/venue. Existing office use
 above first floor level to remain.

Public Notices

Mayo County Council - Shell E&P Ireland Limited intends to apply for permission for development at a site of 160 ha, approximately, in the townland of Bellagelley South, Bellanaboy Bridge, County Mayo, and a site of 117 ha, approximately, in the townlands of Srahmore and Attavally, Bangor-Erris, County Mayo, for the development of a gas terminal for the reception and separation of gas from the Corrib Gas Field, and for a peat deposition site, respectively.

The development will consist of the concurrent development of two sites located 11 kilometres apart, approximately, and identified as the site of the gas terminal for the reception and separation of gas from the Corrib Gas Field in the townland of Bellagelley South, Bellanaboy Bridge, County Mayo (the Bellagelley South site) and the site of the peat deposition site in the townlands of Srahmore and Attavally, Bangor-Erris, County Mayo (the Srahmore site), respectively.

The development at the Bellagelley South site will consist of: a gas terminal for the reception and separation of gas including plant and equipment; provision of 4,935 sq m (gross floor area), approximately, of buildings; access roads; 40 no. car parking spaces; and ancillary developments, of which 13 ha, approximately, will be developed in respect of the gas terminal's footprint. The proposed development of the Bellagelley South site will also consist of: the excavation and removal of 450,000 cubic metres, approximately, of peat from the Bellagelley South site, off site, to the Srahmore site; civil works, inclusive of foundations and piling; the provision of a single storey control building with a gross floor area of 400 sq m, approximately, inclusive of a control room, offices, equipment rooms, kitchenette, locker room and toilets; the provision of a single storey administration building with a gross floor area of 1,015 sq m, approximately, inclusive of a gatehouse, offices, a conference room and an emergency response room, canteen, kitchenette, laboratory, archive room, first aid room, store rooms, lockers, changing rooms and toilets; the provision of a maintenance building with a gross floor area of 800 sq m, inclusive of a warehouse, stores, mechanical workshop, welding and fabrication shop, instruments and electrical workshops, a plant room, toilets and a maintenance vehicle shed; a weighbridge; and a lattice antenna structure of 22 m in height, approximately, for site-wide radio communications. The development of the Bellagelley South site will also consist of: a diesel storage tank of 75 cubic metres capacity, approximately, a nitrogen generation unit; an air compressor package; a utility area (for plant); a power generation and switchroom building with a gross floor area of 525 sq m, approximately, for the production of electricity for the proposed gas terminal, to include 3 no. generator sets each with a capacity of 1.3 MW; an emergency generator with a capacity of 650kW; 1 no. emergency generator diesel day-tank and 1 no. diesel distribution pump; a high pressure and low pressure flare tower of some 40 m in height, approximately; a ground flare with a stack height of some 12 m, approximately; a transformer building with a gross area of 410 sq m, approximately, to include a 400v switchroom; a heating medium heater with a stack height of 20 m, approximately; 3 no. flare knock out drums; 2 no. low pressure gas compressors; a methanol recovery system comprising of 1 no. methanol still of 33 m in height, approximately; a heating medium storage tank with a capacity of 40 cubic metres, approximately; a sales gas compressor building with a gross floor area of 890 sq m, approximately, to include 2 no. sales gas compressors, each with a 7.7 MW ISO rated gas turbine driver; a gas-to-gas heat exchanger; a corrugated plate interceptor; effluent feed/treated water sumps; a water treatment building with a gross floor area of 235 sq m, approximately, containing a multi-media filter, ultrafiltration and nanofiltration membrane units, ion exchange beds, an activated carbon filter and a sludge treatment facility; 3 no. condensate storage tanks, of 10 m each in height, approximately, and 10 m each in diameter, approximately; 2 no. product methanol tanks of 8.4 m each in diameter, approximately, and 10 m each in height, approximately; 3 no. raw methanol storage tanks 13.5 m each in diameter, approximately, and 10 m high, approximately; a fire water pond with a capacity of 7,200 cubic metres, approximately; a used firewater pond with a capacity of 5,000 cubic metres, approximately; a firewater pump building with a gross floor area of 660 sq m, approximately, to include 4 no. fire water pumps, each with capacity of 60C cubic metres per hour, approximately, and 4 no. diesel engine drivers, each rated at 265kW (absorbed) approximately; a finger type Slug Catcher; an inlet pig receiver with a withdrawal footprint of 15 sq m approximately; a sales gas metering unit with a footprint of 200 sq m, approximately; an odorant tank with a capacity of 10 cubic metres, approximately; a sales gas pig launcher with a loading / withdrawal footprint of 15 sq m, approximately; an Onshore Terminal Termination Unit (OTTU) measuring 2 m long by 1 m wide by 2.5 m high, approximately; an electricity substation; a Road Tanker Loading / Unloading area; a waste storage area occupying an area of 990 sq m, approximately; the provision of a number of pipetracks and piperacks joining elements of plant together; the provision of 2 no. settlement ponds and associated drainage arrangements; landscaping works; stock proof fencing around the perimeter of the proposed development; security fencing around the terminal and settlement ponds inside the stock proof fence; paved internal access roads; provision of vehicular access to the R314 via an improved forestry access road and the provision of entrance walls and gates; the reconfiguration of the existing entrance from the site to the R314 to include the widening of the entrance and the provision of a deceleration lane; realignment of the R314 to the south of its current location, at the site entrance, over a length of 115 m, approximately, to the west of the centreline of the existing site entrance and over a length of 80 m, approximately, to the east of the centreline of the existing site entrance (over a total length of 195 m, approximately); an emergency vehicular access road to the county road running between Pollatomish and the R314 via; an improved forestry access road; a new maintenance access and maintenance road from the R314 to the 2 no. settlement ponds; and all other site development work and landscaping above and below ground.
