Subject: Section 42 Notice - Reg No W0260-01 CHI Environmental Ltd, Granny Quarry, Co. Kilkenny

Dear Caroline,

I refer to your letter received on the 3rd October 2014 in relation to above and wish to respond as follows -

Planning permission was granted under P06/1772 to Mr. Robert Murphy as follows

Permission to carry out deposition works in a quarry site in accordance with Waste Permit WMP22/2003. The site will be accessed from the Kilmacow Road until the proposed new entrance permitted by P06/246 can be provided. The existing quarry is included in the Record of Protected Structures listed in the 2002 County Development Plan as a Grade 4 industrial archaeology site (RPS Ref D129). The application also seeks permission for RETENTION of an existing site office, oil storage hut and site works and for permission for a weighbridge, weighbridge office, personnel facilities, oil store and bund and additional site works adjacent to the permitted new entrance, Granny, Kilmacow, Co. Kilkenny.

WMP22/2003 permit relates to the *Levelling of non-hazardous waste from construction and demolition activity to reclaim my agricultural land.*

Activities permitted in accordance with the 4th Schedule of the Waste management Acts 1996 as amended

R 2 recycling or reclamation of organic substances which are not used as solvents

R4 recycling or reclamation of other inorganic materials.

R 10 spreading of any waste on land with a consequential benefit for agricultural activity or ecological system, including composting and other biological transformation processes.

The subsequent permit granted WMP023/2007 was for infilling and processing

Activities permitted

R 2 recycling or reclamation of organic substances which are not used as solvents

R 4 recycling or reclamation of other inorganic materials.

R 10 spreading of any waste on land with a consequential benefit for agricultural activity or ecological system, including composting and other biological transformation processes.

R 12 Exchange of waste for submission to any activity referred to in a preceding paragraph of this schedule.

R 13 Storage of waste intended for submission to any activity referred to in a preceding paragraph of this schedule, other than temporary storage, pending collection on the premises where the waste is produced.
100,000 tonne/yr, 300,000 tonne over 3 yrs.

The permit WMP22/2003 was granted for the infill of waste. Processing of C&D waste was granted in a subsequent permit WMP023/2007.

The Planning Authority considers that the activities to which the license relates as outlined in your letter are not excluded or restricted by the planning permission granted for the site. There is no planning enforcement relating to the site.

No limits in terms of tonnage were specified in the planning permission. The Planning Authority expects that the quarry closure plan which has not been formally agreed with the Planning Authority will quantify the total amount of material to fill the void space and reinstate, remediate and rehabilitate (including landscaping) the site.

If you have any further queries please do not hesitate to contact the Planning Department.

Regards,
Ross O'Shea
