Dear Ms. Burke,

Ballinaboy Gas Terminal

Have you been informed by Shell E & P Ireland Ltd., that when they loaded the gas from the Corrib Field into the pipes at their terminal in Ballinaboy, the "ground shook" to quote one of those in attendance, even though the pressure was only at half that at which is expected to function?

I should like a reply before the Ballinaboy Terminal owners decide, as they must, to run the gas through at full pressure, as otherwise my inquiry may well become part of the inquiry.

Sincerely,

Liam Power
