Re: IPPC Licence Application – Mr Damien Treanor
Location of Facility: Killnagullan, Emyvale, Co. Monaghan
Reg. No.: P0937-01

Dear Sir/Madam,

We refer to the above mentioned IPPC application for a facility at Killnagullan, Emyvale, Co. Monaghan.

Inland Fisheries Ireland (IFI) is a Statutory Body established on the 1st July 2010. Under section 7(1) of the Inland Fisheries Act 2010 (No. 10 of 2010) the principal function of IFI is the protection, management and conservation of the inland fisheries resource.

Having examined the Environmental Impact Statement, which was submitted we have no objection to this application, from a fisheries perspective, provided that:

- All effluent, soiled water and solid wastes shall be stored on site in adequately sized and sited watertight structures.
- Buildings shall comply with Department of Agriculture standards and regulations.
- All effluent/soiled water to be disposed of by landspreading shall be carried out in accordance with the Department of Agriculture's booklet Good Farming Practice and the Nitrates Regulations.
- Only clean, uncontaminated storm water shall be discharged from the site.

The site is located close to a tributary of the Ulster Blackwater, which is part of the Neagh Bann International River Basin District. As this is a salmonid catchment it is important that the proposed development does not have a negative impact on the aquatic habitat.

Please notify us of your full decision in due course.

Yours faithfully,

Michaela Kirrane,
Senior Fisheries Environmental Officer,
IFI, Dublin
