Subject: Submission Re: DAS application by Dublin Port Company

Licensing | Environmental Protection Agency licensing@epa.ie

I write to you to express my concern and opposition at the recent proposal of Dublin Port to undertake a dredging project that will see 9.7 million tonnes of dredge waste into Dublin Bay.

I am very concerned about the potential for the release of hydrogen sulphide in the area around the dredging. Similar emissions of hydrogen sulphide were reported in Cork and that operation was 10 times smaller than this proposal. Further to these potential emissions is the possibility of dredging up heavy metal deposits often found in shipping ports. Such deposits are often harmless when trapped in the sediment but could prove disastrous if disturbed and then redistributed into the coastal waters.

I live locally and Dublin Bay is not just part of the local scenery, it is part of my home and my community.

Plus it's disgusting, if it's too toxic for land waste then it should be too toxic for sea aswell, find another way to get rid of it.

Yours sincerely,

Nichola OSullivan
