RE:

EPA Submission

Reg#: P1031-01 (Mr. Colm Ryan - Piggery in Nantinan, Milltown, Co.Kerry)

To whom it may concern,

We wish to make a submission in relation to the above EPA application.

We live in Corbally, Killorglin which is directly adjacent to Nantinan. Our house is roughly 450m west from the piggery entrance. Over the years we have endured noxious smells coming from the piggery at times. We have had to close windows and stay inside on many occasions. We rarely hang clothes on the outside line due to the smell and we have had to explain to visitors about the smell.

We do not object to the piggery operating as a business in our local area. There are times when smells and noise happen in conjunction with farming. This is part of living in a rural area and we fully accept this. However, there are persistent odours coming from the piggery and it has been going on for years.

We would estimate that there are problem odours reaching us from the piggery about 20% of the time. To us, this is a chronic nuisance. It happens far too often to be acceptable. It also seems to have become worse in the last 2 years.

We have concerns about the noxious smell. Is there a chemical component to the smell? What are the potential effects on our 3 young children growing up beside this smell? If it is just a smell, should we have to put up with it?

We feel that we should not have to inhale smells or chemicals emanating from another property near where we live.

We would ask that you take note of our concerns while considering this application. I would reiterate that we have no problem with Mr. Ryan operating his business here. We feel that he should take steps to significantly reduce the emissions from his premises.

Yours sincerely,

Barry & Kelly McGrath
